Rationalist Bias in Communication Theory Shedletsky, Leonard, 2021-06-04 While communication theory has

not recognized the implications of the social intuitionist model psychologists have gathered an impressive body of evidence to support the theory In social cognition research there was the idea that human inferential processes are conscious rational logical and accurate and this belief continues somewhat in the behavioral sciences although there is evidence that it is incorrect A fresh examination is needed on just how these inferences by the receiver and the implications by the sender carried out at high speed impact our understanding of the communication process Simply put until now the default case in communication theory is the belief that we consciously reason and then we act However that may not be entirely true Rationalist Bias in Communication Theory applies social intuition theory to human communication This book explores how research has missed accounting for a critical fact about human communication in the theories of communication namely that we as humans can respond to one another and to all kinds of stimuli faster than we can deliberate By applying intuitive cognition to communication a new light can be shed on the communication process which is what the chapters prove and discuss This book is valuable for social scientists practitioners researchers academicians and students interested in new theories in communication theory

Empowering Novice Academics for Student Success Dr Johann Hugo,2021-04-26

The preparation for a career in education and training cuts into all three categories of knowledge cognitive affective and psychomotor and all four dimensions of competence The implication is that effective teaching requires not only theoretical knowledge but also practical abilities that include a range of instructional skills and techniques The workbook therefore contains a number of activities intended to promote professional competence The types of activities vary they are used to stimulate thinking promoting reflective practice and provide guidance in the application of knowledge as well as developing certain instructional skills Note that the amount of activities included here is only scratching the surface different teaching matters should receive priority in the continuous professional development CPD of academic staff Readers may perceive some of the activities as challenging or find it difficult to relate to that owing to being novices in higher education teaching and learning In view of this the reading includes comments on each activity Activity solutions as well as comments on the reflection activities as a further attempt at supporting and enhancing the professional development of novice teachers The workbook includes reading on aspects of resource design for learning enhancement Since this particular topic involves many technical aspects it is presented separately from the content in the textbook and is regarded as an enrichment opportunity
