Carbon Sequestration In Agricultural Soils A Multidisciplinary Approach To Innovative Methods:

Carbon Sequestration in Agricultural Soils Alessandro Piccolo, 2012-01-11 This compilation of techniques methodologies and scientific data arises from a four year Italian research project which took place at university research stations in Turin Piacenza Naples and Potenza Soil Organic Matter SOM represents an active and essential pool of the total organic carbon on the planet Consequently even small changes in this SOM carbon pool may have a significant impact on the concentration of atmospheric CO₂ Recent new understanding of the chemical nature of SOM indicates that innovative and sustainable technologies may be applied to sequester carbon in agricultural soils Overall results of the project have been applied to develop an innovative model for the prediction and description both quantitatively and qualitatively of carbon sequestration in agricultural soils This book provides experts in different areas of soil science with a complete picture of the effects of new soil management methods and their potentials for practical application in farm management Agroforestry for Monetising Carbon Credits Abhishek Raj, Manoj Kumar Jhariya, Ram Swaroop Meena, 2025-08-13 This book explores carbon credits and trading within agroforestry systems It covers atmospheric CO₂ management as well as achieving net zero and net negative carbon emissions through the carbon credit concept and its application in agroforestry systems amidst climate change Carbon farming in agroforestry contributes to carbon footprint mitigation while ensuring ecosystem health and environmental sustainability The book discusses trading protocols including soil carbon credits in agroforestry and the monetisation of carbon credits from various agroforestry systems for the benefit of farmers Additionally it addresses challenges and proposes a future roadmap regarding carbon credit based policies in agroforestry The book emphasises new insights derived from updated research development and extension activities aimed at combating climate change through carbon sequestration in agroforestry enhancing the carbon credits for landowners and increasing productivity as per the forum conferences of parties under the United Nations *Sustainable Agrochemistry* Sílvia Vaz Jr., 2019-05-28 This book presents a broad range of technologies for sustainable agrochemistry e g semiochemicals for pest management nanotechnology for release of eco friendly agrochemicals and green chemistry principles for agriculture It provides a concise introduction to sustainable agrochemistry for a professional audience and highlights the main scientific and technological approaches that can be applied to modern agrochemistry It also discusses various available technologies for reducing the negative impacts of agrochemicals on the environment and human health *The Future of Soil Carbon* Carlos Garcia, Paolo Nannipieri, Teresa Hernandez, 2018-04-10 The Future of Soil Carbon Its Conservation and Formation provides readers with an integrative approach to understanding the important role of organic carbon in soil functioning and fertility Terrestrial interactions between SOC and complex human natural systems require new fundamental and applied research into regional and global SOC budgets This book provides new and synthesized information on the dynamics of SOC in the terrestrial environment In addition to rigorous state of the art on soil science the book also provides strategies to avoid risks of soil

carbon losses Soil organic carbon SOC is a vital component of soils with important and far reaching effects on the functioning of terrestrial ecosystems Human activities over the last several decades have significantly changed the regional and global balance of SOC greatly exacerbating global warming and climate change Provides a holistic overview of soil carbon status and main threats for its conservation Offers innovative solutions to conserve soil carbon Includes in depth treatment of regional and global changes in soil organic carbon budget Advances in Agronomy ,2025-08-29 Advances in Agronomy Volume 194 the latest release in this leading reference on agronomy contains a variety of updates and highlights new advances in the field each written by an international board of authors Includes numerous timely state of the art reviews on the latest advancements in agronomy Features distinguished well recognized authors from around the world Builds upon this venerable and iconic review series Covers the extensive variety and breadth of subject matter in the crop and soil sciences

Plant Litter Björn Berg, Charles McClaugherty, 2020-12-03 This book gives basic facts about litter decomposition studies which are of guidance for scientists who start studies Since the publication of the third edition there has been quite a development not only in the field of litter decomposition but also in supporting branches of science which are important for fruitful work on and understanding of decomposition of plant litter and sequestration of carbon A consequence is that old established truths are becoming outdated New knowledge in the fields of phytochemistry and microbial ecology has given a new baseline for discussing the concepts litter decomposition and carbon sequestration We can also see a rich literature on litter decomposition studies using roots and wood as substrates These have given new insights in factors that regulate the decomposition rate and as regards roots their contribution to sequestered carbon in humus Additional facts on the role of temperature vs the litters chemical composition may in part change our view on effects of climate change Further information on applications of the new analytical technique ^{13}C NMR for determining organic chemical compounds has allowed us to develop these parts Focus is laid on needle litter of Scots pine as a model substrate as this species has been considerably more studied than other litter species Also the boreal northern temperate coniferous forest has in part been given this role Still new information may allow us to develop information about litter from further tree species
