Code Associations Fondations 2016 Comment:

Greek and Roman Painting and the Digital Humanities Marie-Claire Beaulieu, Valérie Toillon, 2021-11-29 This volume is a groundbreaking discussion of the role of digital media in research on ancient painting and a deep reflection on the effectiveness of digital media in opening the field to new audiences The study of classical art always oscillates between archaeology and classics between the study of ancient texts and archaeological material For this reason it is often difficult to collect all the data to have access to both types of information on an equal basis The increasing development of digital collections and databases dedicated to both archaeological material and ancient texts is a direct response to this problem The book's central theme is the role of the digital humanities especially digital collections such as the Digital Milliet in the study of ancient Greek and Roman painting Part 1 focuses on the transition between the original print version of the Recueil Milliet and its digital incarnation Part 2 addresses the application of digital tools to the analysis of ancient art Part 3 focuses on ancient wall painting The book will be of interest to scholars working in art history classics archaeology and digital humanities

Uniform Rules for European Contract Law? Francisco de Elizalde, 2018-06-28 Over the last 30 years the evolution of *acquis communautaire* in consumer law and harmonising soft law proposals have utterly transformed the landscape of European contract law The initial enthusiasm and approval for the EU programme has waned and post Brexit it currently faces increasing criticism over its effectiveness In this collection leading academics assess the project and ask if such judgements are fair and suggest how harmonisation in the field might be better achieved This book looks at the uniform rules in the context of the internal market national legislators and courts bridging the gap between common and civil law and finally their influence on non member states Critical and rigorous it provides a timely and unflinching critique of one of the most important fields of harmonisation in the European Union

Éviter, réduire, compenser les impacts environnementaux Christian Huglo, Caroline Grenet, Joachim Guillemard, 2022-08-09 Éviter réduire compenser n'est pas un slogan mais une séquence juridique qui fixe les trois objectifs progressifs essentiels qui constituent l'une des principales clés de la politique française de protection de la biodiversité Cette séquence impose pour tout projet plan programme ou aménagement qu'il affecte l'environnement d'abord d'éviter d'y porter atteinte ensuite de réduire les impacts connus et en dernier lieu de compenser ceux qui n'ont pu être ni évités ni

suffisamment réduits Cet ouvrage qui permet de passer des grands principes la pratique propose une présentation d'ensemble de l'arsenal législatif et réglementaire disponible loi sur la reconquête de la biodiversité de la nature et des paysages de 2016 et les apports de la loi portant lutte contre le dérèglement climatique et renforcement de la résilience face à ses effets et des différentes jurisprudences permettant d'apprécier la réelle efficacité du dispositif Malgré un sujet très peu développé par les dispositions législatives et réglementaires cet ouvrage définit les notions juridiques de la séquence dite ERC partie 1 de taille le champ d'application et sa mise en œuvre par le droit public partie 2 explique sa mise en œuvre par le droit privé partie 3 et enfin précise les éléments de contrôle et de sanction de la séquence ERC tout en abordant ses aspects contentieux partie 4 Cet ouvrage permet aux juristes d'avoir une connaissance précise du sujet mais au-delà tous les citoyens qui ont pris conscience de l'enjeu de la biodiversité au même titre que de celui du climat de comprendre les enjeux juridiques de la séquence ERC

Arbitrage international Mauro Rubino-Sammartano, 2019-09-09 Cette édition française largement révisée et mise à jour met l'accent minutieusement sur les aspects procéduraux qui ont créé un arbitrage international plutôt qu'une simple instance dans laquelle les parties sont de nationalités différentes ou qui concerne des rapports transnationaux L'ouvrage apporte de nouveaux concepts tels que la définition de l'arbitrage international fondée sur le droit procédural différent du droit transnational et une doctrine la doctrine du tronc commun pour identifier le droit matériel applicable aux litiges entre les parties appartenant à différents pays et qui suggère qu'un droit de l'arbitrage international s'est développé à travers différentes conventions et lois Cette édition a été largement enrichie des arbitrages commerciaux internationaux des arbitrages relatifs aux traités d'investissement des arbitrages entre des organismes publics entre les États et les individus de la loi type de la CNUDCI et des procédures du Tribunal Iran-USA ainsi que l'arbitrage relatif aux marchandises les procédures d'arbitrage en ligne et d'arbitrage sportif En plus de traiter tous ces aspects de l'arbitrage par thème l'auteur présente une troisième génération d'arbitrage qui se fonde sur l'analyse préalable des principaux obstacles au bon fonctionnement d'un arbitrage

The Colonization of Names Benjamin C. Brower, 2025-08-19 French colonization dismantled Algerian names Under the occupation that began in 1830 not only were Algerian towns and streets renamed in honor of French figures but personal names were forced to follow French conventions and norms Colonial authorities simplified and transformed Algerian names to suit their administrative and legal purposes crudely transcribing and transliterating Arabic and Berber They imposed a two-part name and surname model that stripped away the extended family ties and social context inherent to precolonial naming practices This groundbreaking history of personal names in nineteenth century Algeria sheds new light on the symbolic violence of renaming and the relationship between language and colonialism Benjamin Claude Brower traces the changes Algerians' personal names suffered during the colonial era and the consequences for individuals and society France's imposition of new names he argues destabilized Algerians' sense of self and place in the community distorted local identities and compromised institutions such as the family Drawing on previously unstudied records Brower examines different northwestern African

naming traditions and how colonialism changed them With the aid of literary and critical theory he develops new insights into the name and its relationship to power and subjectivity A rigorous theoretical and historical account of symbolic violence The Colonization of Names unveils many unseen forms of harm under colonial rule **Case-Based Reasoning Research and Development**

David W. Aha, Jean Lieber, 2017-06-19 This book constitutes the refereed proceedings of the 25th International Conference on Case Based Reasoning Research and Development ICCBR 2017 held in Trondheim Norway in June 2017 The 27 full papers presented together with 3 keynote presentations were carefully reviewed and selected from 38 submissions The theme of ICCBR 2017 Analogy for Reuse was highlighted in several events These papers which are included in the proceedings address many themes related to the theory and application of case based reasoning analogical reasoning CBR and Deep Learning CBR in the Health Sciences Computational Analogy and Process Oriented CBR *The Mononuclear Phagocyte System in Infectious Disease* Geanncarlo Lugo-Villarino, Céline Cougoule, Etienne Meunier, Yoann

Rombouts, Christel Vérolet, Luciana Balboa, 2019-10-04 The Mononuclear Phagocyte System MPS of vertebrates is composed of monocytes macrophages and dendritic cells Together they form part of the first line of immune defense against a variety of pathogens bacteria fungi parasites and viruses and thus play an important role in maintaining organism homeostasis The mode of transmission type of replication and mechanism of disease causing differ significantly for each pathogen eliciting a unique immune response in the host Within this context the MPS acts as both the sentinel and tailor of the immune system As sentinels MPS cells are found in blood and within tissues throughout the body to patrol against pathogenic insult The strategy to detect microbial non self relies on MPS to recognize conserved microbial products known as pathogen associated molecular pattern PAMPs PAMPs recognition represents a checkpoint in the response to pathogens and relies on conserved pattern recognition receptors PRRs Upon PRR engagement MPS mount a cell autonomous attack that includes the internalization and compartmentalization of intracellular pathogens into toxic compartments that promote destruction In parallel MPS cells launch an inflammatory response composed of a cellular arm and soluble factors to control extracellular pathogens In cases when innate immunity fails to eliminate the invading microbe MPS serves as a tailor to generate adaptive immunity for pathogen eradication and generation of memory cells thus ensuring enhanced protection against re infection Indeed MPS cell functions comprise the capture process migration and delivery of antigenic information to lymphoid organs where type 1 immunity is tailored against intracellular microbes and type 2 immunity against extracellular pathogens However this potent adaptive immunity is also a double edge sword that can cause aberrant inflammatory disorders like autoimmunity or chronic inflammation For this reason MPS also tailors tolerance immunity against unwanted inflammation Successful clearance of the microbe results in its destruction and proper collection of debris resolution of inflammation and tissue healing for which MPS is essential Reciprocally as part of the evolutionary process taking place in all organisms microbes evolved strategies to circumvent the actions bestowed by MPS cells Multiple pathogens modulate the

differentiation maturation and activation programs of the MPS as an efficient strategy to avoid a dedicated immune response Among the most common evasion strategies are the subversion of phagocytosis inhibition of PRR mediated immunity resistance to intracellular killing by reactive oxygen and nitrogen species restriction of phagosome maturation modulation of cellular metabolism and nutrient acquisition regulation of cell death and autophagy and modulation of pro inflammatory responses and hijacking of tolerance mechanisms among others The tenet of this eBook is that a better understanding of MPS in infection will yield insights for development of therapeutics to enhance antimicrobial processes or dampen detrimental inflammation for the host s benefit We believe that contributions to this topic will serve as a platform for discussion and debate about relevant issues and themes in this field Our aim is to bring expert junior and senior scientists to address recent progress highlight critical knowledge gaps foment scientific exchange and establish conceptual frameworks for future MPS investigation in the context of infectious disease
