Multiphase Catalytic Reactors Zeynep Ilsen Önsan,Ahmet Kerim Avci,2016-07-05 Provides a holistic approach to multiphase catalytic reactors from their modeling and design to their applications in industrial manufacturing of chemicals Covers theoretical aspects and examples of fixed bed fluidized bed trickle bed slurry monolith and microchannel reactors Includes chapters covering experimental techniques and practical guidelines for lab scale testing of multiphase reactors Includes mathematical content focused on design equations and empirical relationships characterizing different multiphase reactor types together with an assortment of computational tools Involves detailed coverage of multiphase reactor applications such as Fischer Tropsch synthesis fuel processing for fuel cells hydrotreating of oil fractions and biofuels processing Structured Catalysts and Reactors Andrzej Cybulski,1997-10-24 Offering discussions of structured catalysts and up to date approaches to catalytic processes this work describes monolithic membrane and arranged catalysts for use in two and three phase processes It examines catalyst preparation characterization process development modelling and optimization as well as reactor design and operation **Unsteady Processes in Catalytic Reactors** YU Sh

Matros,1985-09-01 The major topic of the book is the investigation of steady and unsteady processes in reactors with a fixed catalyst bed and the formulation of practical recommendations for realizing catalytic processes of high efficiency The material is based mainly on research carried out at the Novosibirsk Institute of Catalysis of the Siberian Branch of the USSR Academy of Sciences Most of the information is technologically orientated and in presenting the subject matter mathematical calculations have often been omitted while the physical sense of the results obtained from the study of mathematical models is always discussed The book has a comprehensive and detailed bibliography and keyword index It will be especially useful for specialists in the field of chemical engineering at industrial companies who are working on the development of catalytic processes in the operation of chemical reactors and for students and post graduate students of the same disciplines
