McCamley, 2007-03-26 This book offers a full examination and description of all the toxic chemical and microbiological agents either tested, manufactured or used since 1914. It identifies the major research, testing and manufacturing plants worldwide with special emphasis on the UK and North America. Among the British sites are Porton Down, Wiltshire; Sutton Oak, Lancashire; Nancekuke, North Cornwall; and the ICI operated plants at Rhydymwn, North Wales and St Helens and elsewhere in Lancashire. It details all verifiable uses of CBW since 1914 and examines the rationale behind such operations. Also studied is the arms race for CBW between competing powers. The author uncovers the scientific arrogance and political ignorance that has led to a greatly exaggerated perception of the potency of CBW, which he maintains is still the case today. Finally, McCamley reveals the scandalous history of inadequate and dangerous storage and disposal practices. **A History of**

Chemical Warfare K. Coleman, 2005-05-23 This book provides an analysis of the development and deployment of chemical weapons from 700BC to the present day The First World War is examined in detail since it remains the most significant experience of the chemical threat but the Second World War and post war conflicts are also evaluated Additionally protocols attempting to control the proliferation and use of chemical weapons are assessed Finally the book examines the threat real and imagined from a chemical warfare attack today by rationally assessing to what extent terrorist groups around the world are capable of making and using such weapons
