Chemical Weapons Destruction And Explosive Waste Unexploded Ordnance Remediations:

Chemical Weapons Destruction and Explosive Waste Robert Noyes,1996-12-31 Some of the more difficult environmental problems facing the Department of Defense DOD include 1 chemical weapons destruction 2 explosive waste remediation and 3 unexploded ordnance clearance and extraction It is conceivable that 50 to 100 billion will be spent by DOD for these three programs offering unusual opportunities for environmental engineering and related firms Military installations are similar to small cities in terms of population industrial activities and some types of contaminated sites However some cover an area larger than a small state DOD has operated industrial facilities on its installations for several decades that have generated stored recycled or disposed of hazardous wastes Many of these activities have contaminated the nearby soil and groundwater To study and clean up contaminated sites DOD established the Installation Restoration Program IRP in 1975 In 1984 the IRP was made part of the Defense Environmental Restoration Program The Secretary of Defense delegated cleanup responsibility to the Army Navy the Air Force and the Defense Logistics Agency DLA Cleanup actions are usually accomplished under contract with private firms which are monitored by the services Most cleanup actions are funded through the Defense Environmental Restoration Account DERA and the Base Realignment and Closure Account Congress established DERA in 1984 to fund the cleanup of inactive contaminated sites on DOD installations The technology to clean up the conventional hazardous wastes on DOD sites are the same as those utilized for industrial sites and well documented by this publisher However there are three DOD programs that require the utilization of somewhat unusual or different technologies that have not been as well documented These three programs are 1 Chemical weapons destruction 2 Remediation of explosives contaminated soils and lagoons 3 Unexploded ordnance detection clearance and extraction This book discusses the current and potential treatment technologies involved in these three programs

ReAction! Mark A. Griep, Marjorie L. Mikasen, 2009-08-12 ReAction gives a scientist's and artist's response to the dark and bright sides of chemistry found in 140 films most of them contemporary Hollywood feature films but also a few documentaries shorts silents and international films Even though there are some examples of screen chemistry between the actors and of behind the scenes special effects this book is really about the chemistry when it is part of the narrative It is about the dualities of Dr Jekyll vs inventor chemists the invisible man vs forensic chemists chemical weapons vs classroom chemistry chemical companies that knowingly pollute the environment vs altruistic research chemists trying to make the world a better place to live and finally about people who choose to experiment with mind altering drugs vs the drug discovery process Little did Jekyll know when he brought the Hyde formula to his lips that his personality split would provide the central metaphor that would come to describe chemistry in the movies This book explores the two movie faces of this supposedly neutral science Watching films with chemical eyes Dr Jekyll is recast as a chemist engaged in psychopharmaceutical research but who becomes addicted to his own formula He is balanced by the often wacky inventor chemists who make their discoveries by trial and error

Protecting Personnel at Hazardous Waste Sites WILLIAM F. MARTIN, 2013-10-22 The second edition of this book brings together a wide range of occupational safety and health recommendations and practices directly applying to hazardous waste site clean ups In addition to providing the most current information on maximum protection for clean up personnel this book is a practical authoritative guide for those involved in clean up operations The completely updated second edition cites the newest OSHA and NIOSH recommendations which have developed over the past decade and explores the new federal emphasis in hazardous waste site clean ups as Radiation safety Toxicology Unexploded ordnance OSHA training EPA training and site health and safety plans
