Cognitive Behavioural Prevention of Suicide in Psychosis Nicholas Tarrier, Patricia Gooding, Daniel Pratt, 2013 This practical and informative text lays out the product of a number of years of clinical research into suicide behaviour and its prevention While the focus is on non affective psychosis and the schizophrenia spectrum disorders the mechanisms underlying suicide behaviour in this group may well underlie or at least influence suicide behaviour in other disorders The authors describe methods of assessment through individual formulation and a cognitive behavioural intervention through case studies to reduce the risk of suicide This book argues that Suicide behaviour lies on a cognitive behavioural continuum from ideation through intention to action Mechanisms based on biased information processing systems the development of suicide schema and appraisal styles are likely to be fruitful in explaining suicidal thoughts and behaviours A psychological theory of suicide behaviour is needed in order to develop a mechanism of suicide and to understand the components of suicidal thoughts and behaviours Suicide risk can be reduced through the use of the intervention methods described within the text Cognitive Behavioural Prevention of Suicide in Psychosis evaluates practical applications of contemporary research on this topic and will therefore be of interest to practitioners post graduates in training and researchers studying suicide and or psychosis

The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management Liza H. Gold, Richard L. Frierson, 2020-03-08 Charged with updating the preeminent text on suicide the new editors of The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management opted not to simply revise existing chapters but instead to steer a bold course expanding reconfiguring and remaking the third edition to reflect the latest research

Dailey,2016-03-31 This is a text that is long overdue I am excited to see such talented and experienced counselors come together to write such an informative updated text on counseling today s adolescents Jennifer Jordan Winthrop University Counseling Adolescents Competently is a comprehensive text for students and professionals compiling foundational and emerging skills in the counseling field Authors Lee Underwood and Frances Dailey review extensive interventions ranging from assessment to diagnosis as well as fresh perspectives on working with this often challenging group Employing clinical case scenarios and profiles that demonstrate key issues this book helps the counselor in training to understand the relevant theories and research around adolescents to better engage in culturally relevant interventions and treatment planning *Approach to the Psychiatric Patient* John W. Barnhill,2018-11-21 A fascinating text that addresses the clinical and educational challenges of treating psychiatric patients from a truly multidisciplinary perspective using a case based format *Approach to the Psychiatric Patient Case Based Essays* is the only book of its kind and an indispensable addition to the mental health practitioner s library The new edition builds upon the strengths that distinguished the first with composite cases that are

carefully constructed to capture real world problems followed by essays that provide clear and cogent perspectives on the case. These essays cover a wide range from the more conventional such as differential diagnosis of anxiety or the clinical characteristics of delirium to the unusual and intriguing such as creativity and mental illness or an analysis of the case in relation to the classic Strange Case of Dr Jekyll and Mr Hyde. Every chapter has been revised and the book boasts many new co contributors as well as the addition of completely new essays. For example in the chapter on geriatric depression several new essays have been added on the topics of collaborative care and the embedded psychiatrist depression and medical illness and biomarkers to identify depression subtypes while the chapter on terminal illness features new essays on spirituality and meaning centered therapy. In addition there are new essays on co occurring anxiety and alcohol use disorders medication assisted treatment for stimulant use treatment of body dysmorphic disorder and more. The text possesses many useful attributes for the reader. The more than 100 essays were written by a broad range of specialists each with particular expertise in their aspect of the case and the resulting commentary is focused and concise. In addition to the case and discussions each chapter offers an overview and summary points designed to facilitate further consideration of the patient and clinical situation and to focus on the key points. The book's unique structure enhances its flexibility allowing the reader to read a case and accompanying essays straight through or to pick and choose as the need or whim arises. The cases' clinical settings are diverse ranging from inpatient hospitalizations and emergency room evaluations to outpatient assessments and long term psychotherapies maximizing relevance and resonance. Each essay has its own bibliography which provides both rigorous documentation and additional sources for more exploration of the topic. Approach to the Psychiatric Patient Case Based Essays distinguishes itself from prior texts in both the richness of its cases and the ingenuity of its format and its multidisciplinary wisdom and insight will be appreciated by a wide range of readers.
