Coleccion Irving Washington:

Spain in America Richard L. Kagan, 2002 Setting aside the pastiche of bullfighters and flamenco dancers that has dominated the U S image of Spain for more than a century this innovative volume uncovers the roots of Spanish studies to explain why the diversity vitality and complexity of Spanish history and culture have been reduced in U S accounts to the equivalent of a tourist brochure Spurred by the complex colonial relations between the United States and Spain the new field of Spanish studies offered a way for the young country to reflect a positive image of itself as a democracy in contrast with perceived Spanish intolerance and closure Spain in America investigates the political and historical forces behind this duality surveying the work of the major nineteenth century U S Hispanists in the fields of history art history literature and music A distinguished panel of contributors offers fresh examinations of the role of U S writers especially Washington Irving and Henry Wadsworth Longfellow in crafting a wildly romantic vision of Spain They examine the views of such scholars as William H Prescott and George Ticknor who contrasted the failure of Spanish history with U S exceptionalism Other essays explore how U S interests in Latin America consistently colored its vision of Spain and how musicology in the United States dominated by German migr s relegated Spanish music to little more than a footnote Also included are profiles of the philanthropist Archer Mitchell Huntington and the pioneering art historians Georgiana Goddard King and Arthur Kingsley Porter who spearheaded U S interest in the architecture and sculpture of medieval Spain Providing a much needed look at the development and history of Hispanism Spain in America opens the way toward confronting and modifying reductive views of Spain that are frozen in another time *Catálogo* Madrid. and the arrangement of documents were designed to foster the creation of new knowledge He draws on a rich collection of eighteenth century architectural plans descriptions models document catalogs and surviving buildings to present a literal materially precise account of archives as assemblages of spaces humans and data assemblages that were understood circa 1800 as capable of actively generating scholarly innovation
