

# 34-150 Unifeeder

The Delta UNIFEEDER is designed to be used on table saws and shapers of 3 H.P. or less, and will increase productivity, quality and safety when used properly. Using the UNIFEEDER will increase productivity since it relieves the operator of hand feeding of most ripping and moulding operations. Quality is improved because the feed speed can be set which produces the best surface finish for the blade or cutter used. Safety is enhanced since operator fatigue is reduced and the need to have hands near the cutting tool is greatly reduced. Also, kickback possibility is reduced due to the constant pressure of the feed rolls on the workpiece.

If the application and maintenance instructions in this manual are carefully followed, your UNIFEEDER will give you years of dependable service.
