By All Means Necessary How Chinas Resource Quest Is Changing The World:

By All Means Necessary Elizabeth Economy, Michael Levi, 2014-03 The explosive growth of China's economy over the past quarter century has been one of the most important events in contemporary times. In short order, China transformed from an impoverished backward country in which peasants comprised the largest portion of the population by far into an industrial dynamo that rivaled only nineteenth century Britain and twentieth century America in its world historical economic impact. Yet like virtually every other major power in modern history that experienced such high growth rates, China eventually had to turn outward to seek the fuel it needed to sustain its turbo-charged economy. While at first it could rely on domestic resources to grow its industries, the staggering expansion of its industrial base in the past fifteen simply overwhelmed its ability to sustain its meteoric growth. Like its American imperialist predecessors in Europe and North America, the People's Republic has embarked on a massive natural resource quest in order to maintain its growth trajectory, and its firms, generally state-owned, are now engaged in a full-scale campaign to extract resources from all corners of the earth. In *By All Means Necessary*, eminent China scholar Elizabeth Economy and her colleague Michael Levi provide a comprehensive account of the topic and also consider where China's pursuit of raw materials may take that nation in coming years. They proceed in logical steps. They begin with the necessary background: the Deng era and then move to the dirty business of basic extraction: mining. After detailing China's mining drive in East Asia, Africa, and Latin America, the materials that allow for manufacturing growth, in the first place, they move on to the PRC's quest for fuel, water, and land for farming, all of which are required for sustaining growth. The logical next step for a nation with a powerful global economic reach is ensuring its own security, and they close by charting how China's military is now trying to secure sea lanes and acquire advanced military technology. This is a clear, authoritative, and provocative overview of an issue that is crucial not just for China but for the world as well.

Research Handbook on EU Energy Law and Policy Rafael Leal-Arcas, 2024-09-06 This thoroughly revised second edition presents a comprehensive overview of the most important contemporary research in EU energy law and policy. The Research Handbook brings together a diverse array of experts highlighting the multifaceted nature of this continually developing field.

The New Cold War, China, and the Caribbean Scott B. MacDonald, 2022-07-15 This book examines the slide into a new Cold War in the Caribbean. The primary argument is that the Caribbean's geopolitics have shifted from a period of relative great power disinterest in the aftermath of the Cold War to a gradual movement into a new Cold War in which a global rivalry between the U.S. and China is acted out regionally. The result of this is a gradual polarization of countries in the Caribbean as they are increasingly pressured to choose between Washington and Beijing, this being very evident during the Trump years. It can be argued that the U.S. focus on the Caribbean in the late 1990s through the early 21st century diminished, leaving the region open to a China ready and eager to do business and guided by a diverse set of objectives. The book brings the reader into a discussion on international relations with

a main focus on U S Chinese relations being played out in the Caribbean an important strategic region for the North American country

China's Foreign Aid and Investment Diplomacy, Volume III John F. Copper, 2016-04-29 Today by many accounts China is the world's foremost purveyor of foreign aid and foreign investment to developing countries. This is the product of China's miracle economic growth over a period of more than three decades together with China's drive to become a major player in world affairs and accomplish this through economic rather than military means. This three volume work is the first comprehensive study of China's aid and investment strategy to trace how it has evolved since Beijing launched its foreign aid diplomacy at the time of the founding of the People's Republic of China in 1949. Volume III offers an analysis of China's foreign aid and investment to countries outside of Asia in Africa, Europe, the Middle East, Latin America and Oceania. Africa was and is the most important of these regions and it is given special treatment. In the concluding chapter Copper reviews the findings of previous volumes, delineates China's most important victories and setbacks and notes opposition to and criticism of China's aid and investment diplomacy. Copper gives evidence that will be shocking to some of the reality that China's financial help to developing countries is one of the most salient trends in international politics and constitutes a formidable challenge to the United States, Japan and Europe as well as international financial institutions.

The Political Economy of Rare Earth Elements Ryan David Kiggins, 2015-07-28 The contributors argue that rare earths are essential to the information technology revolution on which humans have come to depend for communication, commerce and increasingly engage in conflict. They demonstrate that rare earths are a strategic commodity over which political actors will and do struggle for control.

Regional Cases in U.S. Foreign Policy Donald M. Snow, 2017-05-01 *Regional Cases in U.S. Foreign Policy* is the perfect accompaniment to *U.S. Foreign Policy: Back to the Water's Edge*. It provides micro level bilateral interactions among specific states, material that is often ignored or downplayed in more general treatments of the subject. Each of the seven chapters is devoted to a region of the world in which the United States conducts significant foreign policy. Each chapter features case studies of American interaction with two different countries in that region, allowing students the opportunity to compare policy interactions across as well as within particular regions.

Sino-Pakistan Partnership Under the China-Pakistan Economic Corridor and the Burden of Expectations Murad Ali, 2025-07-18 This book has come up with the most up to date comprehensive and objective analysis of China's investments in Pakistan under the China Pakistan Economic Corridor, a flagship project of the Belt and Road Initiative. It covers the broad range of Sino-Pakistan relations in the backdrop of Pakistan's complex political governance, security, socio-environmental and technological challenges that hinder implementation of CPEC projects. Backed by robust empirical evidence, a unique feature of this volume is that it demystifies several myths about CPEC concerning debt trap narrative, China's win-win proposition and Pakistan's mantra of game changer and fate changer. By examining Chinese infrastructure building initiative vis-à-vis competing economic initiatives such as the US G7 led Partnership for Global Infrastructure Investment, the Global Gateway

strategy of the European Union and the India Middle East Europe Economic Corridor of the G20 a distinctive significance of this book is that it aptly situates the implications of China's growing role in Pakistan in broader regional and global context
