By Oliver Sacks An Anthropologist On Mars Seven Paradoxical Tales:

An Anthropologist on Mars Oliver Sacks, 2012-11-14 From the bestselling author of *The Man Who Mistook His Wife for a Hat* Fascinating portraits of neurological disorder in which men women and one extraordinary child emerge as brilliantly adaptive personalities whose conditions have not so much debilitated them as ushered them into another reality Here are seven detailed narratives of neurological patients including a surgeon consumed by the compulsive tics of Tourette s syndrome unless he is operating an artist who loses all sense of color in a car accident but finds a new sensibility and creative power in black and white and an autistic professor who cannot decipher the simplest social exchange between humans but has built a career out of her intuitive understanding of animal behavior Sacks combines the well honed mind of an academician with the verve of a true storyteller

An Anthropologist on Mars Oliver Sacks, 2011-06-16 In *An Anthropologist on Mars* Oliver Sacks uses case studies to illustrate the myriad ways in which neurological conditions can affect our sense of self our experience of the world and how we relate to those around us Writing with his trademark blend of scientific rigour and human compassion he describes patients such as the colour blind painter or the surgeon with compulsive tics that disappear in the operating theatre patients for whom disorientation and alienation but also adaptation are inescapable facts of life An inexhaustible tourist at the farther reaches of the mind Sacks presents in sparse unsentimental prose the stories of seven of his patients The result is as rich vivid and compelling as any collection of short fictional stories Independent on Sunday Now part of the Picador Collection a series showcasing the very best of modern literature

An Analysis of Oliver Sacks's *The Man Who Mistook His Wife for a Hat* and Other Clinical Tales Dario Krpan, Alexander O' Connor, 2017-07-05 In *The Man Who Mistook His Wife for a Hat* neurologist Oliver Sacks looked at the cutting edge work taking place in his field and decided that much of it was not fit for purpose Sacks found it hard to understand why most doctors adopted a mechanical and impersonal approach to their patients and opened his mind to new ways to treat people with neurological disorders He explored the question of deciding what such new ways might be by deploying his formidable creative thinking skills Sacks felt the issues at the heart of patient care needed redefining because the way they were being dealt with hurt not only patients but practitioners too They limited a physician s capacity to understand and then treat a patient s condition To highlight the issue Sacks wrote the stories of 24 patients and their neurological clinical conditions In the process he rebelled against traditional methodology by focusing on his patients subjective experiences Sacks did not only write about his patients in original ways he attempt to come up with creative ways of treating them as well At root his method was to try to help each person individually with the core aim of finding meaning and a sense of identity despite or even thanks to the patients condition Sacks thus redefined the issue of neurological work in a new way and his ideas were so influential that they heralded the arrival of a broader movement narrative medicine that placed stronger emphasis on listening to and incorporating patients experiences and insights into their care

An

Anthropologist on Mars Oliver W. Sacks, 1996 Neurological patients Oliver Sacks once wrote are travellers to unimaginable lands An anthropologist on Mars offers portraits of seven such travellers including a British Columbia surgeon consumed by the compulsive tics of Tourette s syndrome unless he is operating an artist who loses all sense of colour in a car accident but finds a new sensibility and creative power in black and white and an autistic professor who cannot decipher the simplest social exchange between humans but has built a career out of her intuitive understanding of animal behaviour *The Power of Neurodiversity* Thomas Armstrong, 2011-10-04 ADHD dyslexia autism the number of illness categories listed by the American Psychiatric Association has tripled in the last fifty years With so many people affected it is time to revisit our perceptions on this culture of disabilities Bestselling author psychologist and educator Thomas Armstrong illuminates a new understanding of neuropsychological disorders He argues that if they are a part of the natural diversity of the human brain they cannot simply be defined as illnesses Armstrong explores the evolutionary advantages special skills and other positive dimensions of these conditions A manifesto as well as a keenly intelligent look at disability *The Power of Neurodiversity* is a must for parents teachers and anyone who is differently brained **Exotics at Home** Micaela di Leonardo, 2000-03-16 What is the exotic after all In this study Micaela di Leonardo reveals the face of power within the mask of cultural difference Focusing on the intimate and shifting relations between popular portrayals of exotic Others and the practice of anthropology that profession assumed to be America s Guardian of the Offbeat she casts new light on gender race and the public sphere in America s past and present Chicago s 1893 Columbian World Exposition and today s college town ethnic boutiques frame di Leonardo s century long analysis *Coping With Asperger Syndrome* Maxine Rosaler, 2003-12-15 Asperger syndrome is a neurobiological disorder that results from abnormalities in the brain These abnormalities that are present in Asperger affect areas of the brain that are responsible for a person s ability to function as a social being in the world This new title will enable young readers to recognize the symptoms of Asperger common misconceptions and how to cope with the disorder Includes a list of related organizations and websites **Why We Like Music** Silvia Bencivelli, 2011 Ranging widely through discoveries in acoustics emotion healing cognition neuroscience and infant development Silvia Bencivelli covers the state of the art in research about our relationship with music and presents several possible conclusions *The Art of Fatherhood* Noah Charney, Miha Mazzini, 2025-10-02 Fatherhood is a fundamental aspect of human existence and a central theme in the arts Yet depictions of fathers in art have been overshadowed by those of mothers and children This book explores representations of fathers in visual culture and literature throughout history from ancient to contemporary times and around the world It includes a broad definition of fathers which also covers father figures and metaphorical fathers The portrayal of fathers in art literature and film has evolved over time reflecting the changing societal attitudes towards fatherhood From the early depictions of father figures as providers and protectors to the more recent portrayals of fathers as involved and nurturing parents art has explored the complexities and challenges of being a father while also showcasing the joys and

rewards that come with the role This will be the definitive look at how fathers have been portrayed in the arts and how that reflects cultural and societal views on fatherhood through history Through this we will draw out lessons on how to be a good father and apply it to parenting today It is the ideal gift for new fathers on Father s Day or following the birth of a first child

Of Divine Warning Jane Anna Gordon, Lewis R. Gordon, 2015-11-17 This book offers a theory of disaster in modern and contemporary society and its impact on the construction of social and political life The theory is premised upon what the authors call the sign continuum where disaster spreads across society through efforts to evade social responsibility for its causes and consequences Phenomena generated by such efforts include the social manifestation of monstrosity disastrous people and other forms of living things and an emerging antipolitics in an effort to assert rule and order A crucial development is the attack on speech a fundamental feature of political life as manifested by the increased expectations of categories of people whose containment calls for shunning and silence
