Catastrophe Law Politics And The Humanitarian Impulse:

Catastrophe Austin Sarat, 2009 From 9 11 to Katrina from Darfur to the Minnesota bridge collapse ours is an age of catastrophe In this era catastrophic events seem to have a revelatory quality they offer powerful reminders of the fragility of our social and institutional architectures making painfully evident vulnerabilities in our social organization that were otherwise invisible By disrupting the operation of fundamental mechanisms and infrastructures of the social order they lay bare the conditions that make our sense of normalcy possible At a time when societies are directing an unprecedented level of resources and ingenuity to anticipating and mitigating catastrophic events *Catastrophe Law Politics and the Humanitarian Impulse* examines the tests that catastrophe poses to politics and humanitarianism as well as to the law It explores legal political and humanitarian responses during times when the sudden discontinuous and disastrous event has become perhaps paradoxically a structural component of our political imagination It asks whether law politics and humanitarianism live up to the tests posed by disaster and the role all of them play in creating a more resilient world Taken together the essays in this book ask us to see through and beyond the myths that surround catastrophe and our responses to it They ask us to rethink our understanding of catastrophe and to imagine new legal political and humanitarian responses In addition to the editors contributors include Thomas Birkland Michele Landis Dauber Kim Fortun Edward Rackley Peter Redfield Peter H Schuck and Susan Sterett

Anticipating Risks and Organising Risk Regulation Bridget M. Hutter, 2010-08-05 Anticipating risks has become an obsession of the early twenty first century Private and public sector organisations increasingly devote resources to risk prevention and contingency planning to manage risk events should they occur This 2010 book shows how we can organise our social organisational and regulatory policy systems to cope better with the array of local and transnational risks we regularly encounter Contributors from a range of disciplines including finance history law management political science social psychology sociology and disaster studies consider threats vulnerabilities and insecurities alongside social and organisational sources of resilience and security These issues are introduced and discussed through a fascinating and diverse set of topics including myxomatosis the 2012 Olympic Games gene therapy and the financial crisis This is an important book for academics and policy makers who wish to understand the dilemmas generated in the anticipation and management of risks

The Cambridge Handbook of Disaster Risk Reduction and International Law Katja L. H. Samuel, Marie Aronsson-Storrier, Kirsten Nakjavani Bookmiller, 2019-02-28 The number intensity and impact of diverse forms of natural and human made disasters are increasing In response the international community has shifted its primary focus away from disaster response to prevention and improved preparedness The current globally agreed upon roadmap is the ambitious Sendai Framework for Disaster Risk Reduction 2015 2030 central to which is the better understanding of disaster risk management and mitigation Sendai also urges innovative implementation especially multi sectoral and multi hazard coherence Yet the law sector itself remains relatively under developed including a paucity of supporting DRR law scholarship

and minimal cross sectoral engagement Commonly this is attributable to limited understanding by other sectors about law s dynamic potential as a tool of disaster risk mitigation despite the availability of many risk related norms across a broad spectrum of legal regimes This unique timely Handbook brings together global and multi sector perspectives on one of the most pressing policy issues of our time

Humanitarianism and Media Johannes Paulmann,2018-12-17 From Christian missionary publications to the media strategies employed by today s NGOs this interdisciplinary collection explores the entangled histories of humanitarianism and media It traces the emergence of humanitarian imagery in the West and investigates how the meanings of suffering and aid have been constructed in a period of evolving mass communication demonstrating the extent to which many seemingly new phenomena in fact have long historical legacies Ultimately the critical histories collected here help to challenge existing asymmetries and help those who advocate a new cosmopolitan consciousness recognizing the dignity and rights of others

The Role of International Environmental Law in Disaster Risk Reduction Jacqueline Peel,David Fisher,2016-09-23 In The Role of International Environmental Law in Disaster Risk Reduction edited by Jacqueline Peel and David Fisher expert authors from four continents offer perspectives on the growing intersection between environmental law and disaster risk management Chapters discuss the potential for retasking environmental law tools and principles for purposes of mitigating the harms of potential disasters including those exacerbated by climate change and approaches for linking institutions and approaches across the environmental climate adaptation and disaster risk management fields internationally This book illustrates the blurring distinction between natural and manmade disasters and the consequences for legal norms and practice in the formerly distinct areas of international environmental law and international disaster law

Culture, Catastrophe, and Rhetoric Robert Hariman,Ralph Cintron,2015-10-01 This volume explores political culture especially the catastrophic elements of the global social order emerging in the twenty first century By emphasizing the texture of political action the book theorizes how social context becomes evident on the surface of events and analyzes the performative dimensions of political experience The attention to catastrophe allows for an understanding of how ordinary people contend with normal system operation once it is indistinguishable from system breakdown Through an array of case studies the book provides an account of change as it is experienced negotiated and resisted in specific settings that define a society s capacity for political action

The Politics and Policies of Relief, Aid and Reconstruction Fulvio Attina,2012-10-15 Disaster policies present a new challenge to the practitioners and students of global politics this book explains how political science enriches the contribution of the social sciences to the study of disaster relief aid and reconstruction following the major disaster events both natural and man made of recent times

The Sympathetic State Michele Landis Dauber,2013 Drawing on a variety of materials including newspapers legal briefs political speeches the art and literature of the time and letters from thousands of ordinary Americans Dauber shows that while this long history of government disaster relief has faded from our memory today it was extremely

well known to advocates for an expanded role for the national government in the 1930s including the Social Security Act Making this connection required framing the Great Depression as a disaster afflicting citizens though no fault of their own Dauber argues that the disaster paradigm though successful in defending the New Deal would ultimately come back to haunt advocates for social welfare By not making a more radical case for relief proponents of the New Deal helped create the weak uniquely American welfare state we have today one torn between the desire to come to the aid of those suffering and the deeply rooted suspicion that those in need are responsible for their own deprivation

Emergency Management and Social Intelligence Charna R. Epstein, Ameya Pawar, Scott. C. Simon, 2014-12-19 For effective preparedness emergency managers must comprehend how a disaster impacts not only the physical infrastructure of the affected community but also the population They must understand how the people interact with one another how they interact with government and how they react to the disaster event In other words they must have social

International Disaster Response Law Andrea de Guttry, Marco Gestri, Gabriella Venturini, 2012-08-31 With a Foreword by Kristalina Georgieva European Commissioner for International Cooperation Humanitarian Aid and Crisis Response Over the last decades natural and man made disasters have been increasing in terms of frequency size number of people affected and material damage caused There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention mitigation and response The implementation of these frameworks however poses serious challenges This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps The authors address the rights and duties of States in preventing and mitigating disasters in facilitating access to their territory for humanitarian relief actors as well as issues related to liability and compensation Due attention is paid to European Union law governing disaster response and to its reform in the light of the Lisbon Treaty and to the main trends in domestic legislation Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed Additional topics such as the status of relief personnel the hindrances to the delivery of relief consignments by customs and excise administration the use of civilian and military defence assets in emergency situations the mechanisms and procedures available to offer financial support for recovery and rehabilitation risk insurance and the issue of corruption during disaster related activities are specifically addressed By drawing on the expertise of lawyers political scientists economists and humanitarian practitioners the book promotes much needed interdisciplinary dialog and sheds light on a largely uncharted field of research It is therefore essential reading for academics and practitioners in international and EU law policy makers civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community's response to large scale calamitous events Over the last decades natural and man made disasters have been increasing in terms of frequency size number of people affected and material damage caused There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention mitigation and response The

implementation of these frameworks however poses serious challenges This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps The authors address the rights and duties of States in preventing and mitigating disasters in facilitating access to their territory for humanitarian relief actors as well as issues related to liability and compensation Due attention is paid to European Union law governing disaster response and to its reform in the light of the Lisbon Treaty and to the main trends in domestic legislation Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed Additional topics such as the status of relief personnel the hindrances to the delivery of relief consignments by customs and excise administration the use of civilian and military defence assets in emergency situations the mechanisms and procedures available to offer financial support for recovery and rehabilitation risk insurance and the issue of corruption during disaster related activities are specifically addressed By drawing on the expertise of lawyers political scientists economists and humanitarian practitioners the book promotes much needed interdisciplinary dialog and sheds light on a largely uncharted field of research It is therefore essential reading for academics and practitioners in international and EU law policy makers civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community s response to large scale calamitous events
