Catching the Light Arthur Zajonc, 1993 Biblical times to the world of modern optics Catching the Light is a brilliant synthesis of history science religion and art that brings together the multifaceted strands of human experience to light the way to a new understanding of ourselves and our cosmos

The Unreal Universe Manoj Thulasidas, 2007 In this immensely thought provoking book Thulasidas explores our notions of space and time and shows how our sense of reality rests on uncertain supports Space is unreal the same way sound and smell are unreal and time is no more real than mathematics In a space created by the brain out of the light falling on our retinas for the Hubble telescope is it a surprise that nothing can travel faster than light Generated by our sensory perception and fabricated by our cognitive process the space time continuum is the arena of physics Looking at reality as a cognitive model of perception Thulasidas sheds new light on spiritual philosophies both Western and Eastern Exploring the overlaps among the sciences and philosophies with impressive surety and clarity The Unreal Universe looks set to revolutionize the way we think of reality and understand both modern physics and ancient spiritual writings Back cover

Light Pollution Handbook Kohei Narisada, Duco Schreuder, 2013-06-05 This book deals with light pollution and about the ways to reduce it Light pollution is one of the negative side effects of artificial outdoor lighting The term light pollution is an unhappy one but as no better alternative seems to exist it will be used throughout this book The function of all outdoor lighting is to enhance the visibility or the aesthetics in the nighttime environment The light should come where it is needed If not it is spilled causing economic and environmental losses as well

as disturbance and discomfort The overall effects are termed light pollution a major form of light pollution is the glow extending over the night sky Sky glow is discussed in many astronomical textbooks and in many popular brochures The present book is primarily aimed at those responsible for outdoor lighting installations Thus an engineering approach has been chosen The level of the book is that of college or University level The book is organized in two parts The first seven chapters cover the areas of general interest and conclude with recommendations The second part deals with the scientific and engineering elaboration of the first part A number of examples are included that refer to specific outdoor lighting installations and projects that are directly related to the reduction of light pollution Finally some information is given about the authors

Mind and Life Pier Luigi Luisi, 2010-12-20 Scientists philosophers and Buddhist scholars discuss the nature of reality in a book that goes inside a Mind and Life Institute conference For over a decade members of the Mind and Life Institute have gathered to discuss questions that are both fundamental and profound can physics chemistry and biology explain the mystery of life How do our philosophical assumptions influence science and the ethics we bring to biotechnology And how does an ancient spiritual tradition throw new light on these questions In Mind and Life Pier Luigi Luisi reproduces this stimulating cross cultural dialogue in which world class scientists philosophers and Buddhist scholars develop a holistic approach to the exploration of reality He also adds scientific background to their presentations as well as supplementary discussions with prominent participants and attendees Interviews with His Holiness the Karmapa the Buddhist monk Matthieu Ricard and the actor and longtime human rights advocate Richard Gere further enrich the material with personal viewpoints Conversation topics range from the origin of matter to the nature of evolution the ethics of genetic manipulation and the question of consciousness and ethics

Color for Science, Art and Technology Kurt Nassau, 1997-12-18 The aim of this book is to assemble a series of chapters written by experts in their fields covering the basics of color and then some more In this way readers are supplied with almost anything they want to know about color outside their own area of expertise Thus the color measurement expert as well as the general reader can find here information on the perception causes and uses of color For the artist there are details on the causes measurement perception and reproduction of color Within each chapter authors were requested to indicate directions of future efforts where applicable One might reasonably expect that all would have been learned about color in the more than three hundred years since Newton established the fundamentals of color science This is not true because the measurement of color still has unresolved complexities Chapter 2 many of the fine details of color vision remain unknown Chapter 3 every few decades a new movement in art discovers original ways to use new pigments and dyes continue to be discovered Chapter 5 the philosophical approach to color has not yet crystallized Chapter 7 new pigments and dyes continue to be discovered Chapters 10 and 11 the study of the biological and therapeutic effects of color is still in its infancy Chapter 2 Color continues to develop towards maturity and the editor believes that there is much common ground between the sciences and the arts and that color is a major connecting bridge

Powerful Persuasion Prof. Tex Sample, 2005-08-01 When it comes to communicating the gospel through new media and technologies churches are often faced with one of two bad options Either they can reject these new vehicles for sharing the faith as not the way we've always done it or they can uncritically embrace them failing to see that when not understood properly these media can obscure the gospel message just as much as they can communicate it If they are going to reach the generations formed by electronic culture churches must engage in a new evangelism one that makes use of new technologies and cultural expressions Sample explains how the electronic generations receive and process the information communicated by new media and how the ways in which our consumerist culture makes use of those media are not good models for how the church can employ them to spread the message of Jesus Christ Read the Introduction now
