Chemical Exposures Nicholas Askounes Ashford, Claudia Miller, 1991 Very Good No Highlights or Markup all pages are intact *Silent Winter* Joanna Moore, 2021-05-01 *Silent Winter* is about the silent spread of toxic chemicals in our daily lives and their role in the growing prevalence of illnesses such as cancer chronic fatigue diabetes asthma digestive issues depression dementia and others The scientific evidence about chronic illness and toxic chemicals is withheld from us through stunningly elaborate efforts so that business can continue as usual Approximately 45% of the adult US population now has at least one chronic illness and chronic illness is commonly caused by chronic exposure to toxic chemicals We are often told that these diseases are a result of our lifestyle or our genes We rarely hear that chronic illness is on the rise as a result of toxic chemicals in consumer products and throughout our environment Industry does not want to change so it is forcing us to change on an evolutionary level to deal with the onslaught of chemicals in our daily lives When we cannot keep up and get ill we are sold chemical solutions to make us feel better But individuals and families dealing with chronic illness often know or suspect that toxic chemicals have played a role in the demise of their health The author also shows how the problem is covered up at a societal level by obscuring what we know and how discussion of possible solutions is silenced by manipulating the marketplace Millions of human lives are being muted as a result of chronic illness Finally the author discusses our way out of this mess In the 1962 book *Silent Spring* Rachel Carson dedicated one short chapter to the anticipated human health impacts from toxic chemicals That chapter seeded the present work *Silent Winter* which was written after sixty additional years of scientific research and widespread human exposure to a variety of toxic chemicals In *Our Stolen Future* 1996 Theo Colborn et al warned of the potential dangers of hormone disrupting chemicals on human health Nearly another 25 years have passed since that writing *Silent Winter* reveals the observed impacts of these hormone disrupting chemicals on human health **Management of Contaminated Site Problems, Second Edition** Kofi Asante-Duah, 2019-04-12 This book outlines the strategies used in the investigation characterization management and restoration and remediation for various contaminated sites It draws on real world examples from across the globe to illustrate remediation techniques and discusses their applicability It provides guidance for the successful corrective action assessment and response programs for any type of contaminated land problem and at any location The systematic protocols presented will aid environmental professionals in managing contaminated land and associated problems more efficiently This new edition adds twelve new chapters and is fully updated and expanded throughout Standing Operating Procedures for Developing Acute Exposure Guideline Levels for Hazardous Chemicals National Research Council, Commission on Life Sciences, Board on Environmental Studies and Toxicology, Committee on Toxicology, Subcommittee on Acute Exposure Guideline Levels, 2001-05-25 *Standing Operating Procedures for Developing Acute Exposure Guideline Levels for Hazardous Chemicals* contains a detailed and comprehensive methodology for developing acute exposure guideline levels AEGLs for

toxic substances from inhalation exposures The book provides guidance on what documents and databases to use toxicity endpoints that need to be evaluated dosimetry corrections from animal to human exposures selection of appropriate uncertainty factors to address the variability between animals and humans and within the human population selection of modifying factors to address data deficiencies time scaling and quantitative cancer risk assessment It also contains an example of a summary of a technical support document and an example of AEGL derivation This book will be useful to persons in the derivation of levels from other exposure routes both oral and dermal as well as risk assessors in the government academe and private industry
