Converting A Word To:

Approaches to Conversion / Zero-Derivation Laurie Bauer, Salvador Valera Hernández, 2005 This thematic publication contains papers presented by invited speakers at a symposium of Conversion Zero Derivation held in conjunction with the 10th International Morphology Conference in Szentendre Hungary in May 2002 and papers from scholars who could not attend that symposium but indicated their interest in contributing to this volume Conversion became an issue again in the nineties probably as a result of the widespread renewed interest in morphology that is in full swing today The papers contained in this book approach conversion from various perspectives and with different purposes in mind They cover topics such as what it means to change category how one can discover the directionality of conversion and the very vexed question of whether an analysis in terms of conversion is or is not to be preferred over one in terms of zero derivation All of these questions were canvassed at the symposium but so were others questions of typology conversion in languages other than English and the question of how far the meaning of conversion is predictable The participants in the symposium were interested to find that with so many people discussing conversion there was remarkably little overlap in the areas addressed

Conversion in English Sándor Martsa,2014-07-18 Drawing on the conceptual metaphor and metonymy theory outlined in works by George Lakoff Ren Dirven G nter Radden and Zolt n K vecses Conversion in English A Cognitive Semantic Approach proposes that the process of conversion in contemporary English is basically a semantic process underlain by a series of conceptual metonymic and metaphoric mappings In the book previous interpretations treating conversion as zero derivation derivation by a zero affix or as syntactically motivated recategorization or as usage based coinage relisting are questioned for they apparently mistake the effect of conversion the obligatory change of word class for its cause the conceptual reanalysis of extralinguistic reality The book also demonstrates that viewing conversion as the result of conceptual mappings makes it possible to view this process as an instantiation of intercategoryal polysemy It also helps to settle the long standing debate concerning the issues of directionality and productivity of conversion
