Contesting Security Strategies Logics Studies:

Contesting Security Thierry Balzacq, 2014-11-20 Contesting Security investigates to what extent the logic of security which underpins securitization can be contained rolled back or dismantled Featuring legitimacy as a cement of security practices this volume presents a detailed account of the logic which sustains security in order to develop a novel approach to the relation between security and the policies in which it is engraved Understanding security as a normative practice the contributors suggest a nuanced and richer take on the conditions under which it is possible advisable or fair to accept or roll back its policies The book comprises four sections each investigating one specific modality of contesting security practices resistance desecuritization emancipation and resilience These strategies are examined compared and assessed in different political and cultural habitats This book will be of much interest to students of critical security studies securitisation theory social theory and IR in general

Identifying Security Logics in the EU Policy Discourse Maciej Stępk, 2022-02-10 This open access book investigates the complexity and the modalities of securitization of migration and border control at the EU level It discusses and compares how different EU institutions and agencies have been deploying different logics of security e g humanitarianism or management of risk while framing increased migratory flows and so called migration crisis as a security problem The book argues that the re development of EU migration and border control policies in response to increased migratory flows of 2015 have revealed an increasingly tangled nature of securitization of migration in the EU This is reflected in the intertwining of security logics where migrants and human mobility tend to be securitized through different sometimes multiple interpretative lenses at different stages of policy framing From a theoretical point of view the book develops a fresh analytical perspective that further contributes to burgeoning discussion on securitization theory By bridging the literature on policy framing and securitization it makes a significant contribution to the debates on both securitization and migration As such this book is of great interest to students academics policy makers and all those working in the fields of EU politics migration security and international relations

Energy Security Logics in Europe Izabela Surwillo, 2019-05-07 This book analyzes energy security dynamics in Europe through the prism of security logics Drawing on the literature on securitization security logics and security contexts it scrutinizes energy security debates and policy developments in Germany Poland and Ukraine focusing on the pipeline politics nuclear energy and renewables sector The contextualized analysis accounts for the wider historical socio economic and cultural background from which energy policies emerge and gives a voice to the different stakeholders from policymakers to the local NGO sector The book sheds light on the root causes of different energy policy decisions and illustrates that European energy security is currently driven by four security logics war subsistence risk and emancipation The logic of emancipation is a newly emergent phenomenon embraced by many bottom up citizens initiatives and manifested in their drive to self reliance the rhetoric of liberation and local practices of energy production The conceptualization and analysis of the emancipatory logic vis vis other energy security

logics help to explain European energy context most effectively with its background conditions emerging trends and often controversial national policy approaches This book will be of much interest to students of critical security studies energy policy and European politics in general Contesting Security Thierry Balzacq,2014-11-20 Contesting Security investigates to what extent the logic of security which underpins securitization can be contained rolled back or dismantled Featuring legitimacy as a cement of security practices this volume presents a detailed account of the logic which sustains security in order to develop a novel approach to the relation between security and the policies in which it is engraved Understanding security as a normative practice the contributors suggest a nuanced and richer take on the conditions under which it is possible advisable or fair to accept or roll back its policies The book comprises four sections each investigating one specific modality of contesting security practices resistance desecuritization emancipation and resilience These strategies are examined compared and assessed in different political and cultural habitats This book will be of much interest to students of critical security studies securitisation theory social theory and IR in general Ethical Security Studies Jonna Nyman,Anthony Burke,2016-03-02 At a time of grave ethical failure in global security affairs this is the first book to bring together emerging theoretical debates on ethics and ethical reasoning within security studies In this volume working from a diverse range of perspectives poststructuralism liberalism feminism just war securitization and critical theory leading scholars in the field of security studies consider the potential for ethical visions of security and lay the ground for a new field ethical security studies These ethical visions of security engage directly with the meaning and value of security and security practice and consider four key questions Who or what should be secured What are the fundamental grounds and commitments of different security ethics Who or what are the most legitimate agents providers or speakers of security What do ethical security practices look like What ethical principles arguments or procedures will generate and guide ethical security practices Informed by a rich understanding of the intellectual and historical experience of security the contributors advance innovative methodological analytical political and ethical arguments that represent the cutting edge of the field This book opens a new phase of collaboration and growth that promises to have great benefits for the more humane effective and ethical practice of security politics This book will be of much interest to students of critical security studies ethics philosophy and international relations Securitization and Desecuritization of FARC in Colombia Basar Baysal,2019-07-05 Securitization and Desecuritization of FARC in Colombia introduces a new dual framework for securitization called dual securitization which regards securitization as a whole process that ends after the desecuritization of the given issue Basar Baysal examines this process in three phases 1 definition 2 construction and 3 in securitization in action Additionally the dual securitization framework takes both bottom up and top down characteristics of the process of securitization into consideration and examines both macro level decision making processes and discursive efforts and micro level security practices This book looks at the Colombian Conflict and the empirical part of the study examines the contextual factors that

facilitated the dual securitization of FARC and the Colombian State definition construction and insecurity in action phases of the dual securitization process and the ongoing process of desecuritization in Colombia **A Media Framing**

Approach to Securitization Fred Vultee, 2022-10-14 Presenting securitization as a communication issue this book combines media framing with the theory of securitization to explain how the discourse of security informs media content and what happens to policy and public understanding when it does Because securitization studies the construction of threats to societal structures as well as political institutional structures this book addresses security framing as a question of identity and the ability of political cultural elites and media actors to manipulate it After setting out how its theories work together the book turns to news and its effects How do media accounts make empirical sense of the world when they are bound by the need to make social cultural sense first How does security look in competing news accounts and how do securitizing frames affect attitudes toward policies and political elites Last the book asks how academics and professionals can address the challenges to a democratic public's role in decision making created by the manipulation of security Bringing together distinct fields within communication studies to reflect on the pressing issue of securitization this book will be a key resource for scholars and students working in the fields of mass communication policy studies critical linguistics and international relations as well as risk and crisis communication **Critical Security and Chinese Politics** Juha A. Vuori, 2014-10-24 This

book examines how critical approaches to security developed in Europe can be used to investigate a Chinese security issue the case of the Falungong The past few decades have produced a rich field of theoretical approaches to security in Europe In this book the security specific notions of securitization the politics of insecurity and emancipation are used as analytical approaches to investigate the anti Falungong campaign in the People's Republic of China This campaign launched in 1999 was the largest security related propaganda campaign since 1989 and was directed against a group of qigong practitioners who were presented as a grave threat to society The campaign had major impacts as new security legislation was established and human rights organizations reported severe mistreatment of practitioners This book approaches one empirical case with three approaches in order to transcend the tendency to pit one approach against another It shows how they highlight different aspects in investigation and how they can be combined to gain more comprehensive insights and thereby invigorate renewed debate in the field Furthermore this is used as a vehicle to discuss more general philosophical issues of theory development and theory development and will assist students to comprehend the effects research framework selection has on a piece of research Such discussions are necessary in order to apply the frameworks in investigations that go beyond the socio political context they were originally developed in This book will be of interest to students of critical security studies Chinese politics research methods and IR in general *Chinese Macrosecuritization* Juha A. Vuori, 2023-11-10 This book provides a holistic picture of Chinese global security discourses with a focus on macrosecritizations The work examines how the People's Republic of China PRC has aligned itself within global security discourses This is approached through the theory

of securitization specifically by using the notion of macrosecuritization as the lens for its analysis. The book offers the first full account of Chinese macrosecuritization discourses and alignments and it aims to discern what security speech with referent objects such as humanity, civilization or nature has done in the domestic and international politics of China. Specifically, the work focuses on the discourses of the Cold War, anti-nuclear weapons, climate change and the Global War on Terror, which have all been postulated in the literature as macrosecuritizations. In addition, it examines discourses with global referent objects that have been put forth by the PRC so that we can see whether its proposals for global security governance take the form of or are legitimated through macrosecuritization. The overall argument in the book is that the way contemporary China uses macrosecuritization discourses provides for ontological security as its position in relation to other major powers is undergoing transformation by allowing it to maintain a consistent narrative of its international self that abides by its own set of moral values and sense of worth. This book will be of interest to students of critical security studies, Chinese politics and International Relations.

Theorising Cyber (In)Security Noran Shafik Fouad, 2024-12-02. This book argues that cybersecurity's informational ontology offers empirical challenges and introduces a new interdisciplinary theoretical and conceptual framework of entropic security. Cyber attacks have been growing exponentially in number and sophistication, ranging from those conducted by non-state actors to state-backed cyber attacks. Accordingly, cybersecurity now constitutes an integral part of public, private and academic discourses on contemporary security. Yet, because its emergence as a novel security field occurred after many long-established frameworks had already been developed, cybersecurity has been repeatedly scrutinised for its compatibility with conventional security theories, concepts and understandings, particularly with that of military security. This book, however, argues that cybersecurity differs profoundly from many other security sectors because of the ontological nature of information that sits at the heart of this field. Through this new framework, the book investigates three key empirical challenges in cybersecurity that are co-produced by its informational ontology: 1. the disordered nature of cybersecurity and its tendency towards increasing insecurity as a manifestation of the intrinsic uncertainties in information systems; 2. the unpredictable and unintended consequences resulting from autonomous cyber attacks that challenge human control of cybersecurity environments; and 3. the persistent harms engendered by mundane cyber threats that do not fit within conventional understandings of existentiality in security theories. Through a detailed analysis of cybersecurity discourses and practices in the USA, 2003, the book goes on to show how these complex cybersecurity challenges are better analysed and theorised through the new information theoretic notion of entropic security. This book will be of much interest to students of cyber security, critical security studies, science and technology studies and International Relations in general.

Embark on a transformative journey with is captivating work, Discover the Magic in **Contesting Security Strategies Logics Studies** .
