Context In Computing A Cross Disciplinary Approach For Modeling The Real World:

Context in Computing Patrick Brézillon, Avelino J. Gonzalez, 2014-12-09 This volume explores how context has been and can be used in computing to model human behaviors actions and communications as well as to manage data and knowledge It addresses context management and exploitation of context for sharing experience across domains The book serves as a user centric guide for readers wishing to develop context based applications as well as an intellectual reference on the concept of context It provides a broad yet deep treatment of context in computing and related areas that depend heavily on computing The coverage is broad because of its cross disciplinary nature but treats topics at a sufficient depth to permit a reader to implement context in his her computational endeavors The volume addresses how context can be integrated in software and systems and how it can be used in a computing environment Furthermore the use of context to represent the human dimension individually as well as collectively is explained Contributions also include descriptions of how context has been represented in formal as well as non formal structured approaches The last section describes several human behavior representation paradigms based on the concept of context as its central representational element The depth and breadth of this content is certain to provide useful as well as intellectually enriching information to readers of diverse backgrounds who have an interest in or are intrigued by using context to assist in their representation of the real world

Modeling and Use of Context in Action Patrick Brézillon, Roy M. Turner, 2022-09-21 This book brings together current research and adopts a pragmatic approach to modeling and using context to solve real world problems The editors were instrumental in creating and continue to be involved in the interdisciplinary research community centered around the biennial CONTEXT International and Interdisciplinary Conference on Modeling and Using Context conference series focused on studying context and its implications for artificial intelligence software applications psychology philosophy linguistics neuroscience as well as other fields The first three chapters lay the foundations looking at the lessons learned over the past 25 years and arguing for a continued shift toward more pragmatic approaches The remaining chapters contain contributions to pragmatic context based research from a wide range of domains including technological problems such as subway incident management and autonomous underwater vehicle control identifying emotions from speech without understanding the words anonymization in a world where privacy is increasingly threatened teaching in context and improving management teaching in a business school

Modeling and Using Context Patrick Brézillon, Roy Turner, Carlo Penco, 2017-06-06 This book constitutes the proceedings of the 10th International and Interdisciplinary Conference on Modeling and Using Context CONTEXT 2017 held in Paris France in June 2017 The 26 full papers and 15 short papers presented were carefully reviewed and selected from 88 submissions The papers feature research in a wide range of disciplines related to issues of context and contextual knowledge and discuss commonalities across and differences between the disciplines approaches to the study of context They are organized in the following topical sections context in representation context modeling of human activities context in

communication context awareness and various specific topics

Research on Modeling and Using Context Over 25

Years Patrick Brézillon, 2023-08-25 This book is the outcome of 25 years of research on how to model and use context in real world applications on a spectrum from technology centered SEPT SART to human centered e.g. FlexMim applications that is from well defined domains to more fuzzy ones. It presents an operational definition of context that initiated a conceptual framework associated with an implementation framework the Contextual Graphs CxG formalism the use of the research for designing a future type of AI systems namely the context based intelligent assistant systems. There is a large international and interdisciplinary community of individuals convinced by the promises of bottom up approaches as an alternative to the current top down approaches in AI mainly Practitioners will discover a tool easy to understand and use Researchers will dispose of a comprehensive conceptual framework facilitating its extension on aspects not yet covered beyond group activity modeling in the realm of the research on AI systems

Context-Aware Communication and Computing: Applications

for Smart Environment Punnarumol Temdee, Ramjee Prasad, 2017-06-29 This book introduces context aware computing providing definitions categories characteristics and context awareness itself and discussing its applications with a particular focus on smart learning environments. It also examines the elements of a context aware system including acquisition modelling reasoning and distribution of context. It also reviews applications of context aware computing both past and present to offer readers the knowledge needed to critically analyse how context awareness can be put to use. It is particularly to those new to the subject area who are interested in learning how to develop context aware computing oriented applications as well as postgraduates and researchers in computer engineering communications engineering related areas of information technology IT. Further it provides practical know how for professionals working in IT support and technology consultants and business decision makers and those working in the medical human and social sciences

Information Modelling and Knowledge Bases XXVIII H. Jaakkola, B. Thalheim, Y. Kiyoki, 2017-01-03 Information modelling and knowledge bases are now essential not only to academics working in computer science but also wherever information technology is applied. This book presents papers from the 26th International Conference on Information Modelling and Knowledge Bases formerly the European Japanese Conference EJC which took place in Tampere Finland in June 2016. The conference provides a platform to bring together researchers and practitioners working with information modelling and knowledge bases and the 33 accepted papers cover topics including conceptual modelling knowledge and information modelling and discovery linguistic modelling cross cultural communication and social computing environmental modelling and engineering and multimedia data modelling and systems. All papers were improved and resubmitted for publication after the conference. Covering state of the art research and practice the book will be of interest to all those whose work involves information modelling and knowledge bases
