A Practical Treatise on the Law of Slavery Jacob D. Wheeler, 1837 *EC Free Movement of Capital, Corporate Income Taxation and Third Countries* B.J. Kiegebeld, D.S. Smit, 2008-02-20

Free movement of capital is at the heart of the Single Market and is one of its four freedoms. It enables integrated open competitive and efficient European financial markets and services. For citizens it means the ability to perform many operations abroad as diverse as opening bank accounts, buying shares in non domestic companies, investing where the best return is, and purchasing real estate. For companies it principally means being able to invest in and own other European companies and take an active part in their management. With all its benefits the free movement of capital brings with it an array of thorny issues. This timely work explores several of the most critical, focusing on the practical ability of national law to satisfy the relevant EU requirements.

Customary International Humanitarian Law Jean-Marie Henckaerts, Louise Doswald-Beck, 2005

In 1996 the International Committee of the Red Cross alongside a range of renowned experts embarked upon a major international study into current state practice in international humanitarian law in order to identify customary law in this area. This book is the result of that study: a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non international armed conflicts. Given that important treaties in this area have not yet been universally ratified, this is a publication of major importance carried out at the express request of the international community. In so doing this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts.
