Data Integration in the Life Sciences Ulf Leser,Felix Naumann,Barbara Eckman,2006-07-06 This book constitutes the refereed proceedings of the Third International Workshop on Data Integration in the Life Sciences DILS 2006 held in Hinxton UK in July 2006 Presents 19 revised full papers and 4 revised short papers together with 2 keynote talks addressing current issues in data integration from the life science point of view The papers are organized in topical sections on data integration text mining systems and workflow

Data Integration in the Life Sciences Amos Bairoch,Sarah Cohen-Boulakia,Christine Froidevaux,2008-06-17 For several years now there has been an exponential growth of the amount of life science data e g sequenced complete genomes 3D structures DNA chips mass spectroscopy data most of which are generated by high throughput periments This exponentialcorpusof data is storedand made availablethrough a large number of databases and resources over the Web but unfortunately still with a high degreeof semantic heterogeneity and varying levels of quality These data must be combined together and processed by bioinformatics tools deployed on powerful and e cient platforms to permit the uncovering of patterns s ilarities and in general to help in the process of discovery Analyzing complex voluminous and heterogeneous data and guiding the analysis of data are thus of paramount importance and necessitate the involvement of data integration techniques DILS 2008 was the fth in a workshop series that aims at fostering disc sion exchange and innovation in research and development in the area of data integration for the life sciences Each previous DILS workshop attracted around 100 researchers from all over the world and saw an increase of submitted pers over the preceding one This year was not an exception and the number of submitted papers increased to 54 The ProgramCommittee selected 18 of them The selected papers cover a wide spectrum of theoretical and practical issues including data annotation Semantic Web for the life sciences and data mining on integrated biological data

Data Integration in the Life Sciences Marcos Da Silveira,Cédric Pruski,Reinhard Schneider,2017-11-03 This book constitutes the proceedings of the 12th International Conference on Data Integration in the Life Sciences DILS 2017 held in Luxembourg in November 2017 The 5 full papers and 5 short papers presented in this volume were carefully reviewed and selected from 16 submissions They cover topics such as life science data modelling analysing indexing and querying life sciences datasets annotating matching and sharing life sciences datasets privacy and provenance of life sciences datasets

Data Integration in the Life Sciences Sören Auer,Maria-Esther Vidal,2018-12-29 This book constitutes revised selected papers from the 13th International Conference on Data Integration in the Life Sciences DILS 2018 held in Hannover Germany in November 2018 The 5 full 8 short 3 poster and 4 demo papers presented in this volume were carefully reviewed and selected from 22 submissions The papers are organized in topical sections named big biomedical data integration and management data exploration in the life sciences biomedical data analytics and big biomedical applications

Data Integration in the Life Sciences Patrick Lambrix,Graham Kemp,2010-08-11 The development and increasingly widespread deployment of high

throughput experimental methods in the life sciences is giving rise to numerous large complex and valuable data resources This foundation of experimental data underpins the systematic study of organisms and diseases which increasingly depends on the development of models of biological systems The development of these models often requires integration of diverse experimental data resources once constructed the models themselves become data and present new integration challenges for tasks such as interpretation validation and comparison The Data Integration in the Life Sciences DILS Conference series brings together data and knowledge management researchers from the computer science research community with bioinformaticians and computational biologists to improve the understanding of how emerging data integration techniques can address requirements identified in the life sciences DILS 2010 was the seventh event in the series and was held in Gothenburg Sweden during August 25-27 2010 The associated proceedings contain 14 peer reviewed papers and 2 invited papers The sessions addressed ontology engineering and in particular evolution matching and debugging of ontologies a key component for semantic integration Web services as an important technology for data integration in the life sciences data and text mining techniques for discovering and recognizing biomedical entities and relationships between these entities and information management introducing data integration solutions for different types of applications related to cancer systems biology and microarray experimental data and an approach for integrating ranked data in the life sciences
