Database and XML Technologies Zohra Bellahsène, Ela Hunt, Michael Rys, Rainer Unland, 2009-08-20 Since its first edition in 2003 the XML Database Symposium series XSym has been a forum for academics practitioners users and vendors allowing all to discuss the use of and synergy between database management systems and XML The previous symposia have provided opportunities for timely discussions on a broad range of topics pertaining to the theory and practice of XML data management and its applications XSym 2009 continued this XSym tradition with a program consisting of 15 papers and a keynote shared with the 12th International Symposium on Database Programming Languages DBPL 2009 We received 26 paper submissions out of which eight papers were accepted as full papers and seven as short demo papers Each submitted paper underwent a rigorous and careful review by four referees for long papers and three for the short ones The contributions in these proceedings are a fine sample of the very best current search in XML query processing including full text keyword and loosely structured queries stream querying and joins and materialized views Among new theoretical advances we included work on a lambda calculus model of XML and XPath on mapping from the enhanced entity relationship conceptual model to the W3C XML Schema Language on transactions and extensions to XPath Finally work on data parallel algorithms compression and practical aspects of XQuery including query forms and the use of Prolog are also part of this volume

Database and XML Technologies Zohra Bellahsène, Akmal B. Chaudhri, Erhard Rahm, Michael Rys, Rainer Unland, 2003-10-02 The Extensible Markup Language XML is playing an increasingly important role in the exchange of a wide variety of data on the Web and elsewhere The database community is interested in XML because it can be used to represent a variety of data formats originating in different kinds of data repositories while providing structure and the possibility to add type information The theme of this symposium is the combination of database and XML technologies Today we see growing interest in using these technologies together for many Web based and database centric applications XML is

being used to publish data from database systems on the Web by providing input to content generators for Web pages and database systems are increasingly being used to store and query XML data often by handling queries issued over the Internet As database systems increasingly start talking to each other over the Web there is a fast growing interest in using XML as the standard exchange format for distributed query processing As a result many relational database systems export data as XML documents import data from XML documents provide query and update capabilities for XML data In addition so called native XML database and integration systems are appearing on the database market and it is claimed that they are especially tailored to store maintain and easily access XML documents *Database and XML Technologies* Stéphane

Bressan,2005-08-18 This book constitutes the refereed proceedings of the Third International XML Database Symposium XSym 2005 held in Trondheim Norway in August 2005 in conjunction with VLDB 2005 and in coordination with the Database and Programming Languages Symposium DBPL 2005 The 15 revised full papers were carefully reviewed and are precluded by a joint XSym DBPL keynote talk The papers are organized in topical sections on indexing support for the evaluation of XPath and XQuery benchmarks and algorithms for XQuery and XPath evaluation algorithms for constraint satisfaction checking information extraction and subtree matching and applications of XML in information systems *Database and XML*
