Cooked Michael Pollan, 2013-04-23 Michael Pollan the

bestselling author of *The Omnivore's Dilemma* *Food Rules* and *How to Change Your Mind* explores the previously uncharted territory of his own kitchen in *Cooked*. *Cooked* is now a Netflix docuseries based on the book that focuses on the four kinds of transformations that occur in cooking. Directed by Oscar winning filmmaker Alex Gibney and starring Michael Pollan, *Cooked* teases out the links between science, culture and the flavors we love. In *Cooked*, Pollan discovers the enduring power of the four classical elements: fire, water, air, and earth, to transform the stuff of nature into delicious things to eat and drink. Apprenticing himself to a succession of culinary masters, Pollan learns how to grill with fire, cook with liquid, bake bread and ferment everything from cheese to beer. Each section of *Cooked* tracks Pollan's effort to master a single classic recipe using one of the four elements. A North Carolina barbecue pit master tutors him in the primal magic of fire; a Chez Panisse trained cook schools him in the art of braising; a celebrated baker teaches him how air transforms grain and water into a fragrant loaf of bread; and finally, several mad genius fermentos, a tribe that includes brewers, cheese makers and all kinds of picklers, reveal how fungi and bacteria can perform the most amazing alchemies of all. The reader learns alongside Pollan, but the lessons move beyond the practical to become an investigation of how cooking involves us in a web of social and ecological relationships. Cooking, above all, connects us. The effects of not cooking are similarly far reaching. Relying upon corporations to process our food means we consume large quantities of fat, sugar and salt, disrupt an essential link to the natural world and weaken our relationships with family and friends. In fact, *Cooked* argues, taking back control of cooking may be the single most important step anyone can take to help make the American food system healthier and more sustainable. Reclaiming cooking as an act of enjoyment and self-reliance, learning to perform the magic of these everyday transformations opens the door to a more nourishing life.

Beans Natalie Rachel Morris, 2020-04-13 Beans are considered a basic staple in most kitchen cupboards, yet these unassuming foodstuffs have a very long history. There is evidence that beans have been eaten for 9,000 years. Whether dried, frozen or canned, beans have substantial nutritional and environmental benefits and can easily be made into a wholesome, satisfying meal. From garbanzos to lentils and from favas to soybeans, *Beans: A Global History* brings to life the rich story of these small yet mighty edibles. Featuring historic and modern recipes that celebrate the wide variety of bean cuisines, this book speaks to the modern trend for healthy eating, taking readers on a vivid journey through the gastronomical, botanical, cultural and political history of beans.

A Million Years in a Day Greg Jenner, 2016-06-21 Who invented beds? When did we start cleaning our teeth? How old are wine and beer? Which came first, the toilet seat or toilet paper? What was the first clock? Every day, from the moment our alarm clock wakes us in the morning until our head hits our pillow at night, we all take part in rituals that are millennia old. Structured around one ordinary day, *A Million Years in a Day* reveals the astonishing origins and development of the daily practices we take for granted. In this gloriously entertaining romp through human history, Greg Jenner explores the gradual and often unexpected evolution of our daily routines. This is not a story of wars, politics or great events. Instead, Jenner has scoured Roman rubbish bins, Egyptian tombs and Victorian
