Transnational Television in Europe Jean K. Chalaby, 2009-02-19 Today transnational TV networks count among television's most prestigious brands and rank among Europe's leading TV channels. This is the first dynamically told story of the extraordinary journey of transnational television in Europe from struggling origins to its present-day boom. It is based in extensive research into the international television industry and makes full use of its author's remarkable access to leading industry figures from Sky and Turner to Discovery and BBC World. The tale begins with a few cross-border TV channels who fought hostile governments, faced antagonism from the broadcasting establishment and provoked the contempt of advertisers. But Jean Chalaby argues the planets came into alignment for pan-European television in the late 1990s when a transnational shift in European broadcasting was produced. He shows how transnational television and globalization have transformed one another and how transfrontier TV networks reflect and help sustain a global economic order in which the connection between national territory and patterns of production and distribution have broken down.

Anime and Manga, Media Across Borders Andrea Esser, Iain Robert Smith, Miguel Á. Bernal-Merino, 2016-01-29 What happened when Sesame Street and Big Brother were adapted for African audiences? Or when video games Final Fantasy and Assassin's Creed were localized for the Spanish market? Or when Sherlock Holmes was transformed into a talking dog for the Japanese animation Sherlock Hound? Bringing together leading international scholars working on localization in television, film and video games, Media Across Borders is a pioneering study of the myriad ways in which media content is adapted for different markets and across cultural borders. Contributors examine significant localization trends and practices such as audiovisual translation and transcreation, dubbing and subtitling, international franchising, film remakes, TV format adaptation and video game localization. Drawing together insights from across the audiovisual sector, this volume provides a number of innovative models for interrogating the international flow of media. By paying specific attention to the diverse ways in which cultural products are adapted across markets, this collection offers important new perspectives and theoretical frameworks for studying localization processes in the audiovisual sector. For further resources, please see the Media Across Borders group website www.mediaacrossborders.com, which hosts a localization bibliography, links to relevant companies, institutions and publications, as well as conference papers and workshop summaries.
