Starting and Lighting Equipment

Description

The electrical system of the tractor is a six-volt system and consists of a generator, voltage regulator, cranking motor, lights, lighting switch and a battery ignition unit with a six-volt battery.

The colored plastic-covered cables are contained in a harness of non-metallic oilproof and waterproof woven braid.

Use the illustrations on pages 64 and 65 and the wiring diagrams on pages 68 and 69 as a guide for identifying the various electrical units and for tracing the electrical cables and connections. Be sure all terminals are clean and securely fastened.

When the electrical equipment is installed at the factory, the battery ground cable is disconnected and taped. Before attempting to start the tractor, make certain that the ground cable is connected.
