Countdown An Autobiography Silver Arrow S:

Unbound Richard L Currier, 2017-08-08 Like *Guns Germs and Steel* a work of breathtaking sweep and originality that reinterprets the human story Although we usually think of technology as something unique to modern times our ancestors began to create the first technologies millions of years ago in the form of prehistoric tools and weapons Over time eight key technologies gradually freed us from the limitations of our animal origins The fabrication of weapons the mastery of fire and the technologies of clothing and shelter radically restructured the human body enabling us to walk upright shed our body hair and migrate out of tropical Africa Symbolic communication transformed human evolution from a slow biological process into a fast cultural process The invention of agriculture revolutionized the relationship between humanity and the environment and the technologies of interaction led to the birth of civilization Precision machinery spawned the industrial revolution and the rise of nation states and in the next metamorphosis digital technologies may well unite all of humanity for the benefit of future generations Synthesizing the findings of primatology paleontology archeology history and anthropology Richard Currier reinterprets and retells the modern narrative of human evolution that began with the discovery of Lucy and other Australopithecus fossils But the same forces that allowed us to integrate technology into every aspect of our daily lives have also brought us to the brink of planetary catastrophe *Unbound* explains both how we got here and how human society must be transformed again to achieve a sustainable future Technology The deliberate modification of any natural object or substance with forethought to achieve a specific end or to serve a specific purpose *Apollo's Legacy* Roger D.

Launius, 2019-05-14 An all encompassing look at the history and enduring impact of the Apollo space program In *Apollo's Legacy* space historian Roger D Launius explores the many faceted stories told about the meaning of the Apollo program and how it forever altered American society The Apollo missions marked the first time human beings left Earth's orbit and visited another world and thus they loom large in our collective memory Many have detailed the exciting events of the Apollo program but Launius offers unique insight into its legacy as seen through multiple perspectives He surveys a wide range of viewpoints and narratives both positive and negative surrounding the program These include the argument that Apollo epitomizes American technological and political progress technological and scientific advances garnered from the program critiques from both sides of the political spectrum about the program's expenses and even conspiracy theories and denials of the program's very existence Throughout the book Launius weaves in stories from important moments in Apollo's history to draw readers into his analysis *Apollo's Legacy* is a must read for space buffs interested in new angles on a beloved cultural moment and those seeking a historic perspective on the Apollo program **Air Force Magazine**, 1989 **Before This**

Decade Is Out Glen E. Swanson, 2013-05-13 Oral histories by 14 participants in the Apollo program include comments by James Webb Thomas O Paine Wernher von Braun and astronauts Harrison Schmitt and Charles Duke 69 black and white illustrations [A Tribute To Our Christian Heritage](#) Stephen Combs, 2011-12-17 How is your knowledge about our Christian

history When secularists dispute the faith of our Founding Fathers are you able to give an answer This book will encourage those who want to know the truth about America s Christian heritage and challenge skeptics who deny it Eastern Air Lines David Lee Russell,2013-10-15 Eastern Air Lines began in 1926 when aviation pioneer Harold Pitcairn started the first carrier air mail route from New York to Atlanta under his company Pitcairn Aviation Clement Keys of National Air Transport bought the company in 1929 changed the name to Eastern Air Transport and began passenger service the next year on daily round trips between New York and Richmond The growing airline was purchased by General Motors and became Eastern Air Lines in 1934 World War I flying ace Edward V Rickenbacker purchased the airline four years later and led it to become by the 1950s the most profitable airline in the United States Former astronaut Frank Borman became president of Eastern in 1975 and tried to manage the airline through deregulation labor union conflict and heavy debt ending with the sale of Eastern to Frank Lorenzo and Texas Air in 1986 The airline entered bankruptcy in March 1989 and ended service in less than two years This detailed history follows Eastern from start to finish studying such corporate decision making as aircraft purchases and route expansions as well as the personalities that shaped the airline throughout its history America in Space Russell R. Tobias,1995-05-30 Thoroughly annotated entries are arranged by subject and indexed by author Most titles are generally available in public or college libraries the many NASA publications may be obtained from government depository libraries Intended as a research guide for high school and college students Annotation copyrighted by Book News Inc Portland OR *Spies and Shuttles* James E. David,2015-01-27 Revealing the connections between NASA and the United States defense community In this real life spy saga James E David reveals the extensive and largely hidden interactions between NASA and U S defense and intelligence departments The story begins with the establishment of NASA in 1958 and follows the agency through its growth not only in scope but also in complexity In *Spies and Shuttles* David digs through newly declassified documents to ultimately reveal how NASA became a strange bedfellow to the Department of Defense DoD and the Central Intelligence Agency CIA He tracks NASA s early cooperation supplying cover stories for covert missions analyzing the Soviet space program providing weather and other scientific data from its satellites and monitoring missile tests that eventually devolved into NASA s reliance on DoD for political and financial support for the Shuttle David also examines the restrictions imposed on such activities as photographing the Earth from space and the intrusive review mechanisms to ensure compliance The ties between NASA and the intelligence community have historically remained unexplored and David s riveting book is the first to investigate the twists and turns of this labyrinthine relationship

Calculated Risk George Leopold,2016 Unlike other American astronauts Virgil I Gus Grissom never had the chance to publish his memoirs save for an account of his role in the Gemini program before the tragic launch pad fire on January 27 1967 which took his life and those of Edward White and Roger Chaffee The international prestige of winning the Moon Race cannot be understated and Grissom played a pivotal and enduring role in securing that legacy for the United States Indeed

Grissom was first and foremost a Cold Warrior a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union to the moon Drawing on extensive interviews with fellow astronauts NASA engineers family members and friends of Gus Grissom George Leopold delivers a comprehensive survey of Grissom s life that places his career in the context of the Cold War and the history of human spaceflight Calculated Risk The Supersonic Life and Times of Gus Grissom adds significantly to our understanding of that tumultuous period in American history Publisher **Reaching for the Moon** Roger D. Launius, 2019-06-25 Fifty years after the Moon landing a new history of the space race explores the lives of both Soviet and American engineers At the dawn of the space age technological breakthroughs in Earth orbit flight were both breathtaking feats of ingenuity and disturbances to a delicate global balance of power In this short book aerospace historian Roger D Launius concisely and engagingly explores the driving force of this era the race to the Moon Beginning with the launch of Sputnik 1 in October 1957 and closing with the end of the Apollo program in 1972 Launius examines how early space exploration blurred the lines between military and civilian activities and how key actions led to space firsts as well as crushing failures Launius places American and Soviet programs on equal footing following American aerospace engineers Wernher von Braun and Robert Gilruth their Soviet counterparts Sergei Korolev and Valentin Glushko and astronaut Buzz Aldrin and cosmonaut Alexei Leonov to highlight key actions that led to various successes failures and ultimately the American Moon landing
