sense after you're an expert. Then it's about time you picked up *Head First HTML* and really learned HTML. You want to learn HTML so you can finally create those web pages you've always wanted so you can communicate more effectively with friends, family, fans, and fanatic customers. You also want to do it right so you can actually maintain and expand your web pages over time so they work in all browsers and mobile devices. Oh, and if you've never heard of CSS, that's okay; we won't tell anyone you're still partying like it's 1999, but if you're going to create web pages in the 21st century, then you'll want to know and understand CSS. Learn the real secrets of creating web pages and why everything your boss told you about HTML tables is probably wrong and what to do instead. Most importantly, hold your own with your co-worker and impress cocktail party guests when he casually mentions how his HTML is now strict and his CSS is in an external style sheet. With *Head First HTML*, you'll avoid the embarrassment of thinking web-safe colors still matter and the foolishness of slipping a font tag into your pages. Best of all, you'll learn HTML and CSS in a way that won't put you to sleep. If you've read a *Head First* book, you know what to expect: a visually rich format designed for the way your brain works. Using the latest research in neurobiology, cognitive science, and learning theory, this book will load HTML and CSS into your brain in a way that sticks. So what are you waiting for?
