Policymakers Cato Institute, David Boaz, 2008 Offers policy recommendations from Cato Institute experts on every major policy issue Providing both in depth analysis and concrete recommendations the Handbook is an invaluable resource for policymakers and anyone else interested in securing liberty through limited government The Obama Doctrine Colin Dueck, 2015 An incisive evaluation of foreign policy and the meaning of power in the Obama era **Stalemate** Greg C. Reeson, 2011-09-01 Since 9 11 the threat of terrorism has concerned Americans more than any other issue they face Author Greg Reeson says this is not likely to change in the near future In Stalemate he argues that we are waging an unwinnable war against terrorism that Muslim extremist ideology is a problem we can manage but not soon solve This conflict with terrorism will not end in victory or defeat at least not in the traditional sense The 9 11 attacks ushered in a new era in which the long term aim of the United States will be the management and mitigation of Islamic extremist violence so that it interferes as little as possible with daily life The book begins with a look at the transition from the Cold War to an era of globalization that facilitated the 9 11 terrorist attacks then explains how the al Qaeda organization founded by Osama bin Laden has transformed into a global network of like minded terrorist groups collectively known as Al Qaeda and Associated Movements or AQAM The author then discusses the components of strategy before walking the reader through the elements of national power Diplomatic Information Military Economic Intelligence Law Enforcement used by the United States in a comprehensive and coordinated effort to reduce the risk of terrorist violence against American citizens and interests worldwide He concludes with a look at the global hotspots where the United States will likely be involved for the foreseeable future a brief discussion of what constitutes victory in this framework and the role the United States will have to take on in the international system in the future *Funding Challenges and Successes in Arts Education* Challons-Lipton, Siu, Emanuel,

Richard, 2017-06-19 The arts and humanities are considered to be a core academic subject under federal law This designation grants these education programs the right to federal funds however budget propositions do not allot the arts sufficient financial resources *Funding Challenges and Successes in Arts Education* is a timely research publication featuring the most recent scholarly information on fiscal changes that support the financing of the humanities in national and international education Including extensive coverage on a number of topics and perspectives such as strategic planning school reform and teacher training this book is ideally designed for academicians researchers teachers and administrators seeking current

research on innovative ways to fund the arts **Between You and Your Doctor** United States. Congress. House. Committee on Oversight and Government Reform. Subcommittee on Domestic Policy, 2011 **Afghanistan and Its Neighbors after the NATO Withdrawal** Kirill Nourzhanov, Amin Saikal, 2016-03-04 The planned reductions in NATO troop numbers in Afghanistan through 2015 and a final withdrawal at the end of 2016 brings up numerous pressing questions about the security and national interests of not just Afghanistan but of the broader region itself The problem of a chaotic Afghanistan or of an outright Taliban victory is of great concern to not only immediate neighbors such as Iran Pakistan and the former Soviet Central Asian republics to the north but also to those countries in the region with Afghanistan related security or economic concerns such as China and India Further abroad Russian American and European interests and plans for dealing with the fallout from Afghanistan must also be taken into account as these major powers have enduring interests in Afghanistan and the region This volume puts the prospects for short and mid term security dynamics at the core of the analysis with each case being placed in its proper contemporary historical economic and political context The book will offer a truly comprehensive nuanced and timely account of the security situation in and around Afghanistan **Equal Is Unfair** Don Watkins, Yaron Brook, 2024-05-01 Shows that government intervention in all areas of our lives not income inequality is what's really threatening the American Dream Mallory Factor New York Times bestselling author of Shadowbosses We've all heard that the American Dream is vanishing and that the cause is rising income inequality The rich are getting richer by rigging the system in their favor leaving the rest of us to struggle just to keep our heads above water To save the American Dream we're told that we need to fight inequality through tax hikes wealth redistribution schemes and a far higher minimum wage But what if that narrative is wrong What if the real threat to the American Dream isn't rising income inequality but an all out war on success In *Equal is Unfair* a timely and thought provoking work Don Watkins and Yaron Brook reveal that almost everything we've been taught about inequality is wrong You'll discover why successful CEOs make so much money and deserve to how the minimum wage hurts the very people it claims to help why middle class stagnation is a myth how the little known history of Sweden reveals the dangers of forced equality The critics of inequality are right about one thing the American Dream is under attack But instead of fighting to make America a place where anyone can achieve success they are fighting to tear down those who already have The real key to making America a freer fairer more prosperous nation is to protect and celebrate the pursuit of success not pull down the high fliers in the name of equality *Getting the Climate Science Facts Right* Medani P. Bhandari, 2022-09-01 *Getting the Climate Science Facts Right* discusses climate change science with reference to the Intergovernmental Panel on Climate Change IPCC Addressing climate change is the most important public priority of the 21st Century Unlike many issues however this issue is being driven by both science and its interface with politics The main institution for bridging this division between science and international politics is the IPCC As such it is the main source of the facts from which climate change policy is developed This book describes the ways in which

the IPCC arrives at these facts and so can be sure they are complete and evidence based Seldom in history has science had such a direct relationship with politics The negotiation of an international policy regime requires at its outset an agreement on the facts In this case the facts are scientific complex and contentious Governments have recognized this and have by using the IPCC set up institutional machinery to provide facts from a source and in a manner that they can accept The way in which the IPCC functions is unique in that it melds the way in which science achieves consensus with the way governments do at the international level Starting with a process to examine review and debate scientific findings leading to a consensus about scientific fact usually expressed as probabilities that the findings will hold over time the IPCC then concludes by using the kind of consensus development mechanism that the United Nations typically uses to achieve agreements leading to the formation of policy regimes The book examines the structure of the IPCC its composition and its procedures in order to achieve an understanding of its role and future
