

Chapter 29 Study Guide: Employment and Labor Law

Employment Security

- What is FMLA and what does it do?
 - FMLA – Family and Medical Leave Act
 - Guarantees both men and women up to 12 weeks of unpaid leave each year for childbirth, adoption, or a serious health condition of their own or in their immediate family

Wrongful Discharge

- When is an Employer prohibited from firing a worker?
 - When an employee is refusing to violate the law (if the instruction of the employer breaks the law)
 - When an employee is exercising a legal right (such as filing for workers' compensation)
 - When an employee is performing a duty (such as jury duty)

Contract Law

- What if an employer makes promises during the hiring process?
 - Promises made to job applicants are generally binding even if not approved by the top executives
- Does an employee handbook create a contract?
 - Yes
- What is an implied covenant of good faith and fair dealing?
 - Requires both parties to behave reasonable, making an honest effort to meet both the spirit and the letter of the contract

Defamation

- What is qualified privilege?
 - Qualified Privilege – employers who give references are only liable for false statements that they know are false or are motivated by ill will
- What if potentially dangerous information is withheld by an employer for an employee reference?
 - Generally, courts have held that employers do not have a legal obligation to disclose information about former employees (just salary and start and end dates)
 - If they outwardly misrepresent a dangerous employee, they may be liable

Intentional Infliction of Emotional Distress

- What is intentional infliction of emotional distress? Is an employer liable?
 - Intentional Infliction of Emotional Distress – an intentional tort in which the harm results from extreme and outrageous conduct that causes serious harm
 - If an employer condones cruel treatment, they may be found liable

description abaqus cae now enables you to create substructures import them into your model database add them to your assembly and recover their data during an analysis the enhancements fall into three categories substructure generation substructure usage and substructure recovery

abaqus 1 a basic introduction youtube - Aug 06 2022

aug 15 2017 446k views 6 years ago this is a basic introduction for structural fem modelling using the popular software abaqus in this video the basics are covered including creating and analyzing a three

using substructures massachusetts institute of technology - Jul 17 2023

substructures are collections of elements from which the internal degrees of freedom have been eliminated retained nodes and degrees of freedom are those that will be recognized externally at the usage level when the substructure is used in an analysis and they are defined during generation of the substructure

generating a substructure massachusetts institute of technology - May 15 2023

generating a substructure a single analysis can include multiple substructure generate steps and abaqus cae creates corresponding output database files for each step multiple preloading steps can precede every substructure generation step in your analysis

using substructures in abaqus youtube - Jun 16 2023

this example shows you how to create a substructure and use it four times in the model as a leg support for storage vessel

generating substructures massachusetts institute of technology - Aug 18 2023

a substructure database is the set of files that describe the mechanical and geometrical properties of a substructure and abaqus writes all substructure data to the substructure database during the substructure generation analysis

substructure generation in abaqus imechanica - Mar 01 2022

dec 17 2013 i have created a substructure in abaqus as output i will like to see the substructure matrices mass stiffness and damping matrices however i m only able to write the mass and stiffness matrices to an output file mtx does anyone know how to create an output file including both the mass stiffness and damping matrices of the substructure

substructuring and substructure analysis massachusetts - Feb 12 2023

the basic substructuring idea is to consider a substructure a part of the model separately and eliminate all but the degrees of

freedom needed to connect this part to the rest of the model so that the substructure appears in the model as a substructure a collection of finite elements whose response is defined by the stiffness and mass o

using substructures virginia tech - Dec 10 2022

substructures are collections of elements from which the internal degrees of freedom have been eliminated retained nodes and degrees of freedom are those that are recognized externally at the usage level when the substructure is used in an analysis and they are defined during generation of the substructure

contact modeling if substructures are present - Jan 31 2022

limitations of structural elements membrane elements cannot be used to overlay a substructure that consists of second order three dimensional brick elements of type c3d20 r h if the substructure will be used as a slave surface normally abaqus standard automatically converts c3d20 r h brick elements to elements with midface nodes c3d27 r h because this

2 14 1 substructuring and substructure analysis - Apr 14 2023

in abaqus standard the response within a substructure once it has been reduced to a substructure is considered to be a linear perturbation about the state of the substructure at the time it is made into a substructure

substructure generate massachusetts institute of - Apr 02 2022

set this parameter equal to yes default if the substructure eigenproblem needs to be solved during substructure generation in abaqus substructure eigenvectors can be used to define substructure modal damping for a given substructure abaqus standard will evaluate the stiffness associated with frequency dependent springs and dashpots at

1 16 1 analysis of a frame using substructures - Mar 13 2023

the purpose of this example is to provide basic demonstration and verification of the substructuring capabilities in abaqus problem description the example is a frame consisting of two columns connected by a beam figure 1 16 1 1 the columns and the beam are each modeled with 10 elements of type b21 once a substructure has been
