Coastal Zone Management Handbook:

Coastal Zone Management Handbook John R. Clark, 2018-05-04 Coastal Zone Management Handbook comprises the first complete manual on coastal resource planning and management technology. Written by an international consultant, this handbook reflects a global perspective on the natural resources, sensitivities, economics, development, productivity, and diversity of coastal zones. The emphasis is on tropical and subtropical coastal ecosystems, but the information is widely applicable. In addition to its comprehensive coverage of general concepts related to coastal regions, the book describes the strategic basis for coastal management, provides a set of working tools for management and planning activities, and presents case histories of management projects around the globe. Extensive references are provided for each management analysis practice technique and solution. Coastal Zone Management Handbook is made up of four sections: *Coastal Zone*

Shoreline Management Handbook Pamela Mason, Angela King, Clay Bernick, 2020 Shoreline habitats and processes are impacted by the decisions we make about managing coastal development and shorelines. Shoreline Management is making choices to address the desire to protect upland property from erosion or develop property balanced with the benefits and uses of natural and nature-based shoreline features and shoreline habitat restoration. This requires a weighing of the private benefits and costs of management actions and the benefits and costs to public-held common resources, also known as the public trust. The natural features along our shorelines—tidal wetlands, beaches, and dunes and riparian buffers—are economically and ecologically valuable. They provide food, shelter, and breeding grounds for a variety of marine animals, recreational and commercial opportunities, water quality services, and can serve as significant protection against coastal storms by dissipating wave energy and absorbing flood waters.
