Assessing Negative Response Bias in Competency to Stand Trial Evaluations Steven J. Rubenzer, 2018-03-22 *Assessing Negative Response Bias in Competency to Stand Trial Evaluations* provides readers with a comprehensive guide to assessing whether a defendant has feigned mental impairment during a competency to stand trial evaluation or simply did not put forth his/her best effort. This book reviews the literature on assessing feigning and negative response bias with particular focus on issues, tests, and data relevant to CST evaluations and examines proposed criteria and statistical methods of determining and classifying assessment results. It introduces readers to aspects of the vibrant neuropsychological response style literature, an area many forensic psychologists appear to have overlooked. Additionally, it offers recommendations for research and policy regarding the parameters of CST assessment.

Positive Youth Development, Mental Health, and Psychological Well-Being in Diverse Youth Nora Wiium, Laura Ferrer-Wreder, Jennifer E. Lansford, Lene Arnett Jensen, 2023-06-15 In this Research Topic, our aim is to examine how personal resources related to competencies, skills, and self-perception, as well as environmental, contextual, and relational features of the social contexts of diverse youth, directly or indirectly, are important to mental health and psychological well-being. As previous research on young people has mainly focused on youth's weaknesses rather than their strengths, our use of Positive Youth Development (PYD) in working with culturally diverse youth and their well-being in this Research Topic is novel. We invite contributions from researchers that were initially presented their papers in a meeting that was held by research partners of the Cross National Project on Positive Youth Development (CN PYD) and who represent an international and multidisciplinary panel of experts on PYD. The CN PYD was initiated in 2014 at the University of Bergen and has an ongoing data collection that involves approximately 10,000 minority and majority youth and emerging adults, ages 16 to 29, living in Africa, Asia, Australia, Europe, New Zealand, and South America. CN PYD uses a strengths-based approach to the conceptualization of youth as resources and agents, which is in opposition to the view of the developmental period of adolescence as being a period inherently fraught with problems and risks. The goal of the cross-national project is to assess personal strengths and contextual resources, considering how these resources come together to facilitate youth thriving and to document how young people make positive and valued contributions to themselves and others. We also advance research on the complex interplay between personal and contextual resources and their connections with risk behaviors and problems, in essence, taking a perspective of the whole child, both in terms of strengths and problems.

Understanding Food Insecurity Maria Sassi, 2017-10-24 This book provides a comprehensive overview of key aspects of food insecurity, including definitional and conceptual issues, information systems, and data sources, indicators, and policies. The early chapters discuss the evolution and limitations of the concept and provide a set of conceptual frameworks for the analysis of food security. Systems used to collect data and their evolution over time are then

explained and the most commonly adopted indicators for monitoring food security are presented Approaches to food security are then thoroughly reviewed decade by decade Specific attention is paid to the food insecurity challenge in the new millennium focusing particularly on recent food crises and institutional and policy related consequences Finally the specific terminology of food aid and assistance is examined with discussion of the instruments recently adopted in the food aid system

administered under controlled conditions with known stimulus properties and validity indicators The CPI and MMPI measures will frequently be instruments of choice in research on personality and psychodynamics of offenders CHAPTER 6 Law Enforcement and Police This chapter encompasses a variety of scales that refer to law enforcement or police agencies Unfortunately in the case of many scales these terms are used simply with the assumption that the respondents understand the concepts and use them in the same way as researchers In other cases however specific policing functions are identified and described As noted in Chapter 3 a standard order of scale presentation is followed First the attitudes scales are presented followed by the behavior ratings per sonality measures milieu ratings prediction measures and finally the very broad category of description After the reviews are completed within each subcategory other scales in that category are listed See Chapter 2 for a description of the criteria that were used in deciding upon whether a scale would be reviewed or simply listed Listed scales are presented by title and bibliographic reference followed by a very brief description
