CT Colonography for Radiographers Joel H. Bortz, Arathi Ramlal, Leonie Munro, 2016-08-23 This book explains every aspect of the role of radiographers in performing CT colonography CTC and interpreting CTC images with the aim of enabling radiographers to extend the scope of their practice. It provides all the information required with respect to procurement of informed consent principles of CT and radiation dose patient preparation and positioning the use of contrast media the performance of diagnostic and screening CTC studies and the interpretation and reporting of images. A wide range of CTC findings are described and depicted covering normal anatomy artifacts hemorrhoids polyps colon cancer diverticular disease lipomas and extracolonic structures. In addition a chapter focusing on self assessment of image interpretation will aid learning. The rising number of CTC studies for colon disorders is adding to an already burdened radiology workload. To reduce this workload radiographers will increasingly be given responsibility to carry out CTC examinations and this book will provide the support that they need in order to perform CTC studies to the standard required.
