Writing on the Wall Philip Van Notten, 2005 Although the significance of 9 11 is subject to debate it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly disruptive events Recent catalysts of this sentiment are eye catching developments such as the SARS Severe Acute Respiratory Syndrome and bird flu outbreaks the Enron and Parmalat scandals political assassinations in Sweden and the Netherlands regime changes in Iraq and Afghanistan and terrorist attacks in Bali Istanbul Madrid and various parts of the Middle East However recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before Looking back in history we see that disruptive processes are common For example 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent the collapse of communism Berlin as the capital of a reunited Germany the wars in the former Yugoslavia the single European currency and the near doubling of the number of European Union member states Changes elsewhere have been no less discontinuous and unforeseen the fall of the Asian tigers the emergence of the Internet and mobile telecommunication and the presidency of Nelson Mandela Societal discontinuity is a relatively new area of concern in policy development Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting which tended to reason from continuous developments and linear processes Rather than making forecasting the future it has become popular to use scenarios as a manner to consider several possible futures Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past present and future developments which can serve as a basis for action Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks Scenario development assumes that the future is uncertain and the directions in which current developments might range from the conventional to the revolutionary In theory scenario development is a way to consider future discontinuity However there are indications that the theoretical promise is not reflected in scenario practice Research has shown that scenarios do not consider the idea of discontinuity as a matter of course In our research we found that a scenario study would benefit from efforts to create and foster a culture of curiosity for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future Only then can one read the writing on the wall of future developments

Fachunterricht in Der Fremdsprache British Council, 1994 *Theoretical Nursing* Afaf Ibrahim Meleis, 2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not

uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher **Discoveries** Houghton Mifflin Company,1988-03 **Nursing Theorists and Their Work - E-Book** Martha Raile Alligood,2017-07-20 A classic text is back with fresh comprehensive nursing theories critiques and philosophies Nursing Theorists and Their Work 9th Edition provides you with an in depth look at 39 theorists of historical international and significant importance This new edition has been updated with an improved writing style added case studies critical thinking activities and in depth objective critiques of nursing theories that help bridge the gap between theory and application In addition the six levels of abstraction philosophy conceptual models grand theory theory middle range theory and future of nursing theory are graphically depicted throughout the book to help you understand the context of the various theories Each theorist chapter is written by a scholar specializing in that particular theorist s work often having worked closely with the theorists to provide the most accurate and complete information possible A case study at the end of each theorist chapter puts the theory into a larger perspective demonstrating how it can be applied to practice Critical Thinking Activities at the end of each theorist chapter help you process the theory presented and apply it to personal and hypothetical practice situations Diagrams for theories help you visualize and better understand inherently abstract concepts A Brief Summary in each theorist chapter helps you review for tests and confirm their comprehension A Major Concepts Definitions box included in each theorist chapter outlines the theory s most significant ideas and clarifies content specific vocabulary Points for Further Study at the end of each chapter directs you to assets available for additional information Quotes from the theorist make each complex theory more memorable An extensive bibliography at the conclusion of each theorist chapter outlines numerous primary and secondary sources of information for further study NEW Improved writing style and increased use of subheadings make the narrative more concise direct and accessible NEW Updated research and findings incorporate new content along with more examples and clinical correlations NEW History of Nursing Science chapter emphasizes nursing science updates UNIQUE Graphical depiction of the six levels of abstraction philosophy conceptual models grand theory theory middle range theory and future of nursing theory helps you to understand the context of the various theories *Contemporary Issues in Special Educational Needs: Considering the Whole Child* David Armstrong,Garry Squires,2012-05-16 This thought provoking and accessible book provides an overview of key issues in the education of children with Special Educational Needs and Disabilities Written by highly experienced practitioners and educationalists the book explores a range of approaches for working with this diverse group of learners and invites you to consider your possible responses The book begins with an historical overview of Special Educational Needs and Disabilities and a critical guide to current policy The contributors then expertly explore and summarise many of the

fascinating topics which arise in practice and scholarly research in this area including Ethical and practical implications of labelling children and young people with forms of special educational needs or disability The role of special schools particularly in light of enduring debates about inclusion exclusion What increased student participation student voice and other facets of a democratic classroom mean for students with Special Educational Needs and Disabilities The contributions psychology can make to developing and enriching educational practice Understanding behaviour in relation to children and young people with Special Educational Needs and Disabilities Case studies are used to illustrate these discussions and the book includes suggested protocols for good practice throughout Throughout the book the reader is asked to reflect on the issues presented and come to their own decisions about what represents good practice in their setting The journey concludes with a look at a possible ideal school or educational setting for children with Special Educational Needs and Disabilities
