Conceptual Structures Information Processing In Mind And Machine Systems Programming Series:

Conceptual Structures John F. Sowa, 1984 This book combines the AI and cognitive sciences approaches In combining insights from each of the separate fields the book gives a unified view of knowledge representation Preface *Conceptual Structures: Integration and Interfaces* Uta Priss, Dan Corbett, Galia Angelova, 2003-08-06 *Conceptual Structures: Theory and Implementation* Heather D. Pfeiffer, Timothy E. Nagle, 1993-11-12 This volume contains revised and expanded versions of papers presented at the Seventh Annual Workshop on Conceptual Graphs held at New Mexico State University in Las Cruces and sponsored by the American Association for Artificial Intelligence and the NMSU Computer Science Department The contents of the volume fall in the areas of representation issues reasoning data modeling and databases algorithms and tools and applications and natural language One of the highlights reported in the volume is the landmark meeting of the first PEIRCE Project Workshop The PEIRCE Project aims to build a state of the art industrial strength conceptual graphs workbench **Conceptual Structures: Applications, Implementation and Theory** Gerard Ellis, 1995-07-21 This book constitutes the proceedings of the Third International Conference on Conceptual Structures ICCS 95 held in Santa Cruz California in August 1995 Conceptual structures are a modern treatment of Peirce's existential graphs a graphic notation for classical logic with higher order extensions Besides three invited papers there are included 21 revised full papers selected from 58 submission The volume reflects the state of the art in this research area of growing interest The papers are organized in sections on natural language applications programming in conceptual graphs machine learning and knowledge acquisition hardware and implementation graph operations and ontologies and theory **Conceptual Structures at Work** Karl Erich Wolff, 2004-07-05 This book constitutes the refereed proceedings of the 12th International Conference on Conceptual Structures ICCS 2004 held in Huntsville AL USA in July 2004 The 21 revised full papers presented together with 5 invited papers were carefully reviewed and selected for inclusion in the book The papers are organized in topical sections on data and conceptual structures concept lattices and concept graphs conceptual frameworks for applications and reasoning with conceptual structures , *Conceptual Structures: Logical, Linguistic, and Computational Issues* Bernhard Ganter, Guy W. Mineau, 2006-12-30 Computerscientistscreatemodelsofaperceivedreality ThroughAI techniques these models aim at providing the basic support for emulating cognitive havior such as reasoning and learning which is one of the main goals of the AI research e ort Such computer models are formed through the interaction of various acquisition and inference mechanisms perception concept learning conceptual clustering hypothesis testing probabilistic inference etc and are represented using di erent paradigms tightly linked to the processes that use them Among these paradigms let us cite biological models neural nets genetic programming logic based models rst order logic modal logic rule based s tems virtual reality models object systems agent systems probabilistic m els Bayesian nets fuzzy logic linguistic models conceptual dependency graphs language based representations etc One of the strengths of the Conceptual Graph CG

theory is its versatility in terms of the representation paradigms under which it falls. It can be viewed and therefore used under different representation paradigms which makes it a popular choice for a wealth of applications. Its full coupling with different cognitive processes lead to the opening of the field toward related research communities such as the Description Logic Formal Concept Analysis and Computational Linguistic communities. We now see more and more research results from one community enrich the other laying the foundations of common philosophical grounds from which a successful synergy can emerge.

Conceptual Structures: Common Semantics for Sharing Knowledge Frithjof Dau, Marie-Laure Mugnier, Gerd Stumme, 2005-07-11 This book constitutes the refereed proceedings of the 13th International Conference on Conceptual Structures ICCS 2005 held in Kassel Germany in July 2005. The 23 revised full papers presented together with 9 invited papers were carefully reviewed and selected from 66 submissions. The papers are organized in topical sections on theoretical foundations, knowledge engineering and tools, and knowledge acquisition and ontologies.

Graph Structures for Knowledge Representation and Reasoning Madalina Croitoru, Pierre Marquis, Sebastian Rudolph, Gem Stapleton, 2018-03-29 This book constitutes the thoroughly refereed post conference proceedings of the 5th International Workshop on Graph Structures for Knowledge Representation and Reasoning GKR 2017 held in Melbourne VIC Australia in August 2017 associated with IJCAI 2017 the 26th International Joint Conference on Artificial Intelligence. The 7 revised full papers presented were reviewed and selected from 9 submissions. The contributions address various issues for knowledge representation and reasoning and the common graph theoretic background allows to bridge the gap between the different communities.
