Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03

The 4th edition of the *Handbook of Research on Educational Communications and Technology* expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten, expanded, and updated. Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research, including major findings and methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross-disciplinary by design, and great effort was taken to invite authors outside of the traditional instructional design and technology community.

Design Research in Education Arthur Bakker, 2018-07-06

Design Research in Education is a practical guide containing all the information required to begin a design research project. Providing an accessible background to the methodological approaches used in design research as well as addressing all the potential issues that early career researchers will encounter, the book uniquely helps the early career researcher to gain a full overview of design research and the practical skills needed to get their project off the ground. Based on extensive experience, the book also contains multiple examples of design research from both undergraduate and postgraduate students to demonstrate possible projects to the reader. With easy-to-follow chapters and accessible question and response sections, *Design Research in Education* contains practical advice on a wide range of topics related to design research projects, including:

- The theory of design research: what it entails and when it is suitable.
- The formulation of research questions.
- How to structure a research project.
- The quality of research and the methodological issues of validity and reliability.
- How to write up your research.
- The supervision of design research.

Through its theoretical grounding and practical advice, *Design Research in Education* is the ideal introduction into the field of design-based research and is essential reading for bachelor's, master's, and PhD students new to the field, as well as to supervisors overseeing projects that use design research.

Design Research in Social Studies Education Beth C. Rubin, Eric B. Freedman, Jongsung Kim, 2019-06-06

This edited volume showcases work from the emerging field of design-based research (DBR) within social studies education and explores the unique challenges and opportunities that arise when applying the approach in classrooms. Usually associated with STEM fields, DBR's unique ability to generate practical theories of learning and to engineer theory-driven improvements to practice holds meaningful potential for the social studies. Each chapter describes a different DBR study exploring the affordances and dilemmas of the approach. Chapters cover such topics as iterative design, using and producing theory, collaborating with educators, and the ways that DBR attends to historical, political, and social context.

What is Next in Educational Research?

Si Fan, Jill Fielding-Wells, 2016-07-08 *What is Next in Educational Research* enables the reader to peek into research at the forefront of a diverse range of education fields as it is being conducted by beginning researchers. The book illustrates the extensive range of research being undertaken in education through a broad range of issues, topics and methodologies that will underpin and provoke research well into the future. The five sections address a range of topics including issues in design and methodology, social integration, language education, leadership and issues in contemporary education. Each chapter makes a valuable contribution to existing educational research and is a testament to the potential of these researchers to lead innovative educational research projects. Both higher degree by research students and their supervisors will find this book particularly useful and interesting as it provides examples of quality research. Higher degree writing illustrates a variety of contemporary methodologies and supports the early publication of student work. **STEM Education with Robotics**

Purvee Chauhan, Vikram Kapila, 2023-05-11 This book offers a synthesis of research, curriculum examples, pedagogy models and classroom recommendations for the effective use of robotics in STEM teaching and learning. Authors Chauhan and Kapila demonstrate how the use of educational robotics can catalyze and enhance student learning and understanding within the STEM disciplines. The book explores the implementation of design-based research (DBR), technological, pedagogical and content knowledge (TPACK) and the 5E instructional model among others. Chapters draw on a variety of pedagogical scaffolds to help teachers deploy educational robotics for classroom use, including research-driven case studies, strategies and standards-aligned lesson plans from real-life settings. This book will benefit STEM teachers, STEM teacher educators and STEM education researchers. *Design-Based Research in Education* Zoi A. Philippakos, Emily Howell, Anthony

Pellegrino, 2021-09-30 Effective research in educational settings requires collaboration between researchers and school-based practitioners to co-design instruction and assessment, analyze findings and make thoughtful revisions. This innovative work presents design-based research (DBR), a key methodology for conducting studies in authentic educational contexts. Leading experts provide examples of high-quality DBR addressing different research foci, grade levels and subject areas. Applications are described for curriculum development, intervention, assessment, digital contexts and teaching second language learners. Also addressed is DBR's role in educator preparation, professional development and other settings.

Perspectives in Contemporary STEM Education Research Thomas Delahunty, Máire Ní Ríordáin, 2022-10-13 This book presents an overview of the methodological innovations and developments present in the field of STEM education research as well as providing a practically orientated resource on research method design more broadly. Featuring a range of international contributors in the field, the book provides a compendium of exemplary innovative methodological designs, implementations and analyses that answer a variety of research questions relating to STEM education disciplines. Charting the thinking behind the design and implementation of successful research investigations, the book's two parts present an accessible and pragmatically framed set of chapters that cover a range of important methodological areas presented by

active researchers in the field Ultimately this book presents a comprehensive resource that explores the act of educational research as related to STEM By showcasing key methodological principles with guidance on practical approaches underpinned by theory the book offers scholarly research informed suggestions for practice It will be of great interest to researchers academics and students in the fields of STEM education and education research methods as well as educational research more broadly
