facilitated the dual securitization of FARC and the Colombian State definition construction and insecurity in action phases of the dual securitization process and the ongoing process of desecuritization in Colombia **A Media Framing**

Approach to Securitization Fred Vultee, 2022-10-14 Presenting securitization as a communication issue this book combines media framing with the theory of securitization to explain how the discourse of security informs media content and what happens to policy and public understanding when it does Because securitization studies the construction of threats to societal structures as well as political institutional structures this book addresses security framing as a question of identity and the ability of political cultural elites and media actors to manipulate it After setting out how its theories work together the book turns to news and its effects How do media accounts make empirical sense of the world when they are bound by the need to make social cultural sense first How does security look in competing news accounts and how do securitizing frames affect attitudes toward policies and political elites Last the book asks how academics and professionals can address the challenges to a democratic public's role in decision making created by the manipulation of security Bringing together distinct fields within communication studies to reflect on the pressing issue of securitization this book will be a key resource for scholars and students working in the fields of mass communication policy studies critical linguistics and international relations as well as risk and crisis communication **Critical Security and Chinese Politics** Juha A. Vuori, 2014-10-24 This

book examines how critical approaches to security developed in Europe can be used to investigate a Chinese security issue the case of the Falungong The past few decades have produced a rich field of theoretical approaches to security in Europe In this book the security specific notions of securitization the politics of insecurity and emancipation are used as analytical approaches to investigate the anti Falungong campaign in the People's Republic of China This campaign launched in 1999 was the largest security related propaganda campaign since 1989 and was directed against a group of qigong practitioners who were presented as a grave threat to society The campaign had major impacts as new security legislation was established and human rights organizations reported severe mistreatment of practitioners This book approaches one empirical case with three approaches in order to transcend the tendency to pit one approach against another It shows how they highlight different aspects in investigation and how they can be combined to gain more comprehensive insights and thereby invigorate renewed debate in the field Furthermore this is used as a vehicle to discuss more general philosophical issues of theory development and theory development and will assist students to comprehend the effects research framework selection has on a piece of research Such discussions are necessary in order to apply the frameworks in investigations that go beyond the socio political context they were originally developed in This book will be of interest to students of critical security studies Chinese politics research methods and IR in general *Chinese Macrosecuritization* Juha A. Vuori, 2023-11-10 This book provides a holistic picture of Chinese global security discourses with a focus on macrosecritizations The work examines how the People's Republic of China PRC has aligned itself within global security discourses This is approached through the theory

of securitization specifically by using the notion of macrosecuritization as the lens for its analysis. The book offers the first full account of Chinese macrosecuritization discourses and alignments and it aims to discern what security speech with referent objects such as humanity, civilization or nature has done in the domestic and international politics of China. Specifically, the work focuses on the discourses of the Cold War, anti-nuclear weapons, climate change and the Global War on Terror, which have all been postulated in the literature as macrosecuritizations. In addition, it examines discourses with global referent objects that have been put forth by the PRC so that we can see whether its proposals for global security governance take the form of or are legitimated through macrosecuritization. The overall argument in the book is that the way contemporary China uses macrosecuritization discourses provides for ontological security as its position in relation to other major powers is undergoing transformation by allowing it to maintain a consistent narrative of its international self that abides by its own set of moral values and sense of worth. This book will be of interest to students of critical security studies, Chinese politics and International Relations. Theorising Cyber (In)Security Noran Shafik Fouad, 2024-12-02. This book argues that cybersecurity's informational ontology offers empirical challenges and introduces a new interdisciplinary theoretical and conceptual framework of entropic security. Cyber attacks have been growing exponentially in number and sophistication, ranging from those conducted by non-state actors to state-backed cyber attacks. Accordingly, cybersecurity now constitutes an integral part of public, private and academic discourses on contemporary security. Yet, because its emergence as a novel security field occurred after many long-established frameworks had already been developed, cybersecurity has been repeatedly scrutinised for its compatibility with conventional security theories, concepts and understandings, particularly with that of military security. This book, however, argues that cybersecurity differs profoundly from many other security sectors because of the ontological nature of information that sits at the heart of this field. Through this new framework, the book investigates three key empirical challenges in cybersecurity that are co-produced by its informational ontology: 1. the disordered nature of cybersecurity and its tendency towards increasing insecurity as a manifestation of the intrinsic uncertainties in information systems; 2. the unpredictable and unintended consequences resulting from autonomous cyber attacks that challenge human control of cybersecurity environments; and 3. the persistent harms engendered by mundane cyber threats that do not fit within conventional understandings of existentiality in security theories. Through a detailed analysis of cybersecurity discourses and practices in the USA, 2003, the book goes on to show how these complex cybersecurity challenges are better analysed and theorised through the new information theoretic notion of entropic security. This book will be of much interest to students of cyber security, critical security studies, science and technology studies and International Relations in general.
