Product

Controlmaster 1000 Analogue Addressable Fire Alarm Control Panels

System Benefits

The New Chubb Controlmaster 1000 Range has some of the most exciting and advanced features found on a fire detection system today

Designed Today for all of Tomorrow's Systems

The Controlmaster 1000 Range has been specifically designed by our R&D Department to meet the rigorous demands of a fast moving and technically challenging new world. From a single stand alone panel to the largest site imaginable, Controlmaster 1000 runs off the competition by offering a cost effective solution to today's complex applications.

Versatile and Powerful

Controlmaster 1000 has at its heart, a superior processor arrangement that not only enables highly detailed Cause and Effects to be completed simply and easily, but actually lets the installer see at a glance the loading on the Loop, the PSU Calculation.

For critical outputs like Plant Shutdown, status monitoring can be displayed at the panel once the activation has occurred, together with indication of output isolation, fault and test facilities. Detectors fitted in the same area or room, may be grouped together so that a single Remote LED output will operate for any detector in the group, sensing a fire condition.

Networking

Control panels, repeater panels, graphical user interfaces and other network peripherals can all be connected together. In extreme terms, Controlmaster 1000 will span from one Loop to sixty-two Loops, on one Panel, with multiple panel expansion.

Remote Terminals (Repeaters)

Three types of Remote display terminals are available. The first is an Rds Repeater, which is connected directly to any Control Panel on the System and displays only the information relating to 'its' panel. Second is a LON Repeater, which displays configurable information, can be connected anywhere on the Network. This version can be set to show information which is most useful to particular staff. Third is the Controlmaster 1000R. Connected onto a Network, it will provide all of the indication and functional controls of any other

panel connected to the same network.

CM1000 runs a dynamic simulation of the cause and effects to prove that the various sound patterns and shutdowns will operate correctly once the system has been handed over.

Wide Area Networks and Remote Diagnostics

With each Controlmaster Network able to accommodate an individual IP Address, there are now no limitations to size and scope of System. This means that no matter how big your business is (even Global) our Fire Systems can keep pace with it. Remote diagnostics across the Internet and Condition Based Monitoring are a reality with Controlmaster.

Displaying the Facts

A significant new feature of the Controlmaster Networking capability is in the ability to display current information, Graphics and even integrated CCTV pictures, to the user at key operational points. Touch Sensitive Screens relay and display easily configurable visual information in order that strategic decisions can be taken in the event of an emergency situation.

Optional 24 Hour Monitoring

Controlmaster 1000 can be connected to a Chubb Alarm Receiving Centre (ARC). This will provide 24 hour remote monitoring ensuring a rapid response to fire or fault conditions.

Designed to exceed the latest European Standards

Our Designers set out to meet the rigorous European Standards EN54 Part 2 & 4. Controlmaster 1000 and tested by the world famous LPCB/BRIE establishment to ensure compliance. Of course the Controlmaster 1000 Range is capable of achieving so much more and your next project is a good opportunity to see how Chubb can easily fulfil your needs.

Chubb Controlmaster User Guide
