Computer Crime Law American Casebook Series:

Computer Crime Law Orin S. Kerr, 2006 This book introduces the future of criminal law. It covers every aspect of crime in the digital age assembled together for the first time. Topics range from Internet surveillance law and the Patriot Act to computer hacking laws and the Council of Europe cybercrime convention. More and more crimes involve digital evidence and computer crime law will be an essential area for tomorrow's criminal law practitioners. Many U.S. Attorney's Offices have started computer crime units as have many state Attorney General offices and any student with a background in this emerging area of law will have a leg up on the competition. This is the first law school book dedicated entirely to computer crime law. The materials are authored entirely by Orin Kerr, a new star in the area of criminal law and Internet law who has recently published articles in the *Harvard Law Review*, *Columbia Law Review*, *NYU Law Review* and *Michigan Law Review*. The book is filled with ideas for future scholarship including hundreds of important questions that have never been addressed in the scholarly literature. The book reflects the author's practice experience as well. Kerr was a computer crime prosecutor at the Justice Department for three years and the book combines theoretical insights with practical tips for working with actual cases. Students will find it easy and fun to read and professors will find it an engaging introduction to a new world of scholarly ideas. The book is ideally suited either for a 2 credit seminar or a 3 credit course and should appeal both to criminal law professors and those interested in cyberlaw or law and technology. No advanced knowledge of computers and the Internet is required or assumed.
