Computer Lib ; Dream Machines Theodor H. Nelson, 1987 Discusses the impact of computers the ways they can and should be used programming programming languages video games privacy and computer manufacturers **Computer Lib** Theodor H. Nelson, 1983 [Computer Lib/Dream Machines](#) Ted Nelson, 2019-08 *Computer Lib* Theodor Holm Nelson, 1974 **Multimedia** Randall Packer, Ken Jordan, 2002 I recommend this book to you with an earnestness that I have seldom felt for any collection of historic texts writes William Gibson in his foreword **Osiris, Volume 38** James Evans, Adrian Johns, 2023-07-18 Perceptively explores the shifting intersections between algorithmic systems and human practices in the modern era How have algorithmic systems and human practices developed in tandem since 1800 This volume of *Osiris* deftly addresses the question dispelling along the way the traditional notion of algorithmic code and human craft as natural opposites Instead algorithms and humans have always acted in concert depending on each other to advance new knowledge and produce social consequences By shining light on alternative computational imaginaries *Beyond Craft and Code* opens fresh space in which to understand algorithmic diversity its governance and even its conservation The volume contains essays by experts in fields extending from early modern arithmetic to contemporary robotics Traversing a range of cases and arguments that connect politics historical epistemology aesthetics and artificial intelligence the contributors collectively propose a novel vocabulary of concepts with which to think about how the history of science can contribute to understanding today's world Ultimately *Beyond Craft and Code* reconfigures the historiography of science and technology to suggest a new way to approach the questions posed by an algorithmic culture not only improving our understanding of algorithmic pasts and futures but also unlocking our ability to better govern our present **HCI Remixed** Thomas Erickson, David W. McDonald, 2007-12-21 Personal and reflective essays that describe how particular works whether papers books or demos from classics to forgotten gems have influenced each writer's approach to HCI Over almost three decades the field of human computer interaction HCI has produced a rich and varied literature Although the focus of attention today is naturally on new work older contributions that played a role in shaping the trajectory and character of the field have much to tell us The contributors to *HCI Remixed* were asked to reflect on a single work at least ten years old that influenced their approach to HCI The result is this collection of fifty one short engaging and idiosyncratic essays reflections on a range of works in a variety of forms that chart the emergence of a new field An article a demo a book any of these can solve a problem demonstrate the usefulness of a new method or prompt a shift in perspective *HCI Remixed* offers us glimpses of how this comes about The contributors consider such HCI classics as Sutherland's Sketchpad Englebart's demo of NLS and Fitts on Fitts Law and such forgotten gems as Pulfer's NRC Music Machine and Galloway and Rabinowitz's Hole in Space Others reflect on works somewhere in between classic and forgotten Kidd's The Marks Are on the Knowledge Worker King Beach's Becoming a Bartender and others Some contributors turn to works in neighboring disciplines Henry Dreyfuss's book on

industrial design for example and some range farther afield to Lovelock's Gaia hypothesis and Jane Jacobs's *The Death and Life of Great American Cities*. Taken together the essays offer an accessible lively and engaging introduction to HCI research that reflects the diversity of the field's beginnings.

Essays explore conceptualizations of tattoos and tattooing in Derrida Deleuze and Guattari Lacan Agamben and Jean Luc Nancy while utilizing theoretical perspectives to interpret tattoos in literary works by Melville Beckett Kafka Genet and Jeff VanderMeer among others. *Tattooed Bodies* prompts readers to explore a few significant questions: Are tattoos unique phenomena or an art medium in need of special theoretical exploration?
