Global Social Media Design Huatong Sun, 2020 Social media users fracture into tribes but social media ecosystems are globally interconnected technically socially culturally and economically At the crossroads Sun presents theory method and case studies to uncover the global interconnectedness of social media design and to bridge differences She articulates a critical design framework with design tools to redress asymmetrical relations in everyday practice and provides three cross cultural social media design and use cases Facebook Japan Weibo and global competition of WhatsApp WeChat LINE and KakaoTalk She calls to reshape the crossroads into a design square where differences are nourished as resources where diverse discourses interact for innovation and where alternative epistemes thrive

Personal Data in Competition, Consumer Protection and

Intellectual Property Law Mor Bakhoun, Beatriz Conde Gallego, Mark-Oliver Mackenrodt, Gintarė

Surblytė-Namavičienė, 2018-11-02 This book analyses the legal approach to personal data taken by different fields of law. An increasing number of business models in the digital economy rely on personal data as a key input. In exchange for sharing their data online, users benefit from personalized and innovative services. But companies' collection and use of personal data raise questions about privacy and fundamental rights. Moreover, given the substantial commercial and strategic value of personal data, their accumulation, control and use may raise competition concerns and negatively affect consumers. To establish a legal framework that ensures an adequate level of protection of personal data while at the same time providing an open and level playing field for businesses to develop innovative data based services is a challenging task. With this objective in mind and against the background of the uniform rules set by the EU General Data Protection Regulation, the contributions to this book examine the significance and legal treatment of personal data in competition law, consumer protection law, general civil law and intellectual property law. Instead of providing an isolated analysis of the different areas of law, the book focuses on both synergies and tensions between the different legal fields, exploring potential ways to develop an integrated legal approach to personal data. *Children, Risk and Safety on the Internet* Sonia Livingstone, Leslie Haddon, Anke

Görzig, 2012-07-18 As internet use is extending to younger children, there is an increasing need for research focus on the risks young users are experiencing as well as the opportunities and how they should cope. With expert contributions from diverse disciplines and a uniquely cross national breadth, this timely book examines the prospect of enhanced opportunities for learning, creativity and communication, set against the fear of cyberbullying, pornography and invaded privacy by both strangers and peers. Based on an impressive in depth survey of 25 000 children carried out by the EU Kids Online network, it offers wholly new findings that extend previous research and counter both the optimistic and the pessimistic hype. It argues that in the main, children are gaining the digital skills, coping strategies and social support they need to navigate this fast changing terrain. But it also identifies the struggles they encounter, pinpointing those for whom harm can follow from risky online encounters. Each chapter presents new findings and analyses to inform both researchers and students in the social sciences and policy makers in government, industry or child welfare who are working to enhance children's digital experiences.

Pressed for Time Judy Wajcman, 2014-11-25 The technologically tethered iPhone addicted figure is an image we can easily conjure. Most of us complain that there aren't enough hours in the day and too many e-mails in our thumb accessible inboxes. This widespread perception that life is faster than it used to be is now ingrained in our culture and smartphones and the Internet are continually being blamed. But isn't the sole purpose of the smartphone to give us such quick access to people and information that we'll be free to do other things? Isn't technology supposed to make our lives easier? In *Pressed for Time*, Judy Wajcman explains why we immediately interpret our experiences with digital technology as inexorably accelerating everyday life. She argues that we are not mere hostages to communication devices and the sense of

always being rushed is the result of the priorities and parameters we ourselves set rather than the machines that help us set them. Indeed, being busy and having action-packed lives has become valorized by our productivity-driven culture. Wajcman offers a bracing historical perspective exploring the commodification of clock time and how the speed of the industrial age became identified with progress. She also delves into the ways time use differs for diverse groups in modern societies, showing how changes in work patterns, family arrangements, and parenting all affect time stress. Bringing together empirical research on time use and theoretical debates about dramatic digital developments, this accessible and engaging book will leave readers better versed in how to use technology to navigate life's fast lane.

Mobile Communication and Low-Skilled Migrants' Acculturation to Cosmopolitan Singapore Rajiv George Aricat, Rich Ling, 2018-04-16

Mobile Communication and Low-Skilled Migrants' Acculturation to Cosmopolitan Singapore examines the role of mobile communication in the acculturation of South Asian labor migrants to Singapore, adopting a mobile phone appropriation model and following a pluralistic typological approach. While presenting data from a questionnaire survey and interviews with low-skilled migrants from Bangladesh and India in Singapore, it explores how their specific social conditions, including their transient status and low entitlements in their host country, influenced their mobile phone appropriation. It considers the links these migrants established and retained with their countries of origin and residence to identify several types of appropriation and acculturation types among the various populations.

Digital Youth Kaveri Subrahmanyam, David Smahel, 2010-11-02

Youth around the world are fittingly described as digital natives because of their comfort and skill with technological hardware and content. Recent studies indicate that an overwhelming majority of children and teenagers use the Internet, cell phones, and other mobile devices. Equipped with familiarity and unprecedented access, it is no wonder that adolescents consume, create, and share copious amounts of content. But is there a cost? *Digital Youth: The Role of Media in Development* recognizes the important role of digital tools in the lives of teenagers and presents both the risks and benefits of these new interactive technologies. From social networking to instant messaging to text messaging, the authors create an informative and relevant guidebook that goes beyond description to include developmental theory and implications. Also woven throughout the book is an international sensitivity and understanding that clarifies how, despite the widespread popularity of digital communication technology, use varies between groups globally. Other specific topics addressed include sexuality on the Internet, online identity and self-presentation, morality, ethics, and civic engagement, technology and health, violence, cyberbullying, and victimization, excessive Internet use, and addictive behavior. This comprehensive volume is a must-have reference for researchers, clinicians, and graduate students across such disciplines as developmental, clinical, child, school, psychology, social psychology, media psychology, medical, and allied health professions, education, and social work.
