Conceiving Kinship Conceiving Kinship:

Conceiving Kinship Monica M. E. Bonaccorso, 2009 Focusing on Southern Europe this study looks at currently hotly debated issues of kinship gender and modern medical technologies It challenges established ideas of cultural continuities and discontinuities within the European context and offers fresh insights into longstanding questions regarding gender and kin relatedness

Conceiving the New World Order Faye D. Ginsburg, Rayna Rapp, 1995-07-31 This volume provides an investigation of the dynamics of reproduction Using reproduction as an entry point the authors examine how cultures are produced contested and transformed as people imagine their collective future in the creation of the next generation

Conceiving Persons Peter Loizos, 2021-03-24 The Monographs on Social Anthropology were established in 1940 and aim to publish results of modern anthropological research of primary interest to specialists This volume provides an international analysis of the core metaphors and practices of human sexual and social reproduction in their personal social and cosmological contexts

Fertility, Conjuncture, Difference Philip Kreager, Astrid Bochow, 2017-09-01 In the last forty years anthropologists have made major contributions to understanding the heterogeneity of reproductive trends and processes underlying them Fertility transition rather than the story of the triumphant spread of Western birth control rationality reveals a diversity of reproductive means and ends continuing before during and after transition This collection brings together anthropological case studies placing them in a comparative framework of compositional demography and conjunctural action The volume addresses major issues of inequality and distribution which shape population and social structures and in which fertility trends and the formation and size of families are not decided solely or primarily by reproduction

The Ethics of Everyday Life Michael Banner, 2014-10-24 The moments in Christ's human life noted in the creeds his conception birth suffering death and burial are events which would likely appear in a syllabus for a course in social anthropology for they are of special interest and concern in human life and also sites of contention and controversy where what it is to be human is discovered constructed and contested In other words these are the occasions for profound and continuing questioning regarding the meaning of human life as controversies to do with IVF abortion euthanasia and the use of bodies or body parts post mortem plainly indicate Thus the following questions arise how do the instances in Christ's life represent human life and how do these representations relate to present day cultural norms expectations and newly emerging modes of relationship themselves shaping and framing human life How does the Christian imagination of human life which dwells on and draws from the life of Christ not only articulate its own but also come into conversation with and engage other moral imaginaries of the human Michael Banner argues that consideration of these questions requires study of moral theology therefore he reconceives its nature and tasks and in particular its engagement with social anthropology Drawing from social anthropology and Christian thought and practice from many periods and influenced especially by his engagement in public policy matters including as a member of the UK's Human Tissue Authority Banner aims to develop the

outlines of an everyday ethics stretching from before the cradle to after the grave **Conceiving Cuba** Elise Andaya, 2014-05-30 After Cuba's 1959 revolution the Castro government sought to instill a new social order Hoping to achieve a new and egalitarian society the state invested in policies designed to promote the well being of women and children Yet once the Soviet Union fell and Cuba's economic troubles worsened these programs began to collapse with serious results for Cuban families *Conceiving Cuba* offers an intimate look at how with the island's political and economic future in question reproduction has become the subject of heated public debates and agonizing private decisions Drawing from several years of first hand observations and interviews anthropologist Elise Andaya takes us inside Cuba's households and medical systems Along the way she introduces us to the women who wrestle with the difficult question of whether they can afford a child as well as the doctors who with only meager resources at their disposal struggle to balance the needs of their patients with the mandates of the state Andaya's groundbreaking research considers not only how socialist policies have profoundly affected the ways Cuban families imagine the future but also how the current crisis in reproduction has deeply influenced ordinary Cubans views on socialism and the future of the revolution Casting a sympathetic eye upon a troubled state *Conceiving Cuba* gives new life to the notion that the personal is always political *Conceiving People* Daniel Groll, 2021-08-24 Each year tens of thousands of children are conceived with donated gametes sperm or eggs Some know the identity of their donors Others never will Questions about what donor conceived people should know about their genetic progenitors are significant for literally millions of people including donor conceived people their parents and donors But the practice of gamete donation also provides a vivid occasion for thinking about questions that matter to everyone What is the value of knowing who your genetic progenitors are How are our identities bound up with knowing where we come from In *Conceiving People* Identity Genetics and Gamete Donation Daniel Groll argues that people who plan to create a child with donated gametes should choose a donor whose identity will be made available to the resulting child This is not Groll argues because having genetic knowledge is fundamentally important Rather it is because donor conceived people are likely to really care about having genetic knowledge and parents should care about what their kids care about **The Routledge Handbook of Anthropology and Reproduction** Sallie Han, Cecília Tomori, 2021-11-09 *The Routledge Handbook of Anthropology and Reproduction* is a comprehensive overview of the topics approaches and trajectories in the anthropological study of human reproduction The book brings together work from across the discipline of anthropology with contributions by established and emerging scholars in archaeological biological linguistic and sociocultural anthropology Across these areas of research consideration is given to the contexts conditions and contingencies that mark and shape the experiences of reproduction as always gendered classed and racialized Over 39 chapters a diverse range of international scholars cover topics including Reproductive governance stratification justice and freedom Fertility and infertility Technologies and imaginations Queering reproduction Pregnancy childbirth and reproductive loss Postpartum and infant care Care kinship and

alloparenting This is a valuable reference for scholars and upper level students in anthropology and related disciplines associated with reproduction including sociology gender studies science and technology studies human development and family studies global health public health medicine medical humanities and midwifery and nursing **The American**

Family Yasushi Watanabe, 2004-12-20 White middle class Americans are one of the most understudied groups in the anthropology of the United States perhaps because of their hegemonic presence in society This book offers the first ethnography of white middle class America from a non native perspective Yasushi Watanabe a Japanese anthropologist examines two social groups in the Boston area to reveal an intimate portrait of the American family These two groups are at opposite ends of the social spectrum in terms of religious ethnic and class backgrounds and in terms of cultural tastes and lifestyles The first group is upper middle class Anglo Saxon Protestant mostly Unitarian or Episcopalian often identified as archetypal middle class America This is a wealthy group that includes descendants of the Boston Brahmins one of America's oldest aristocratic families closely related to Democratic hopeful John Kerry The second group is working class or lower middle class Irish Catholic often referred to as Boston Irish Informed by a wide range of social theory The American Family is a fascinating study of family dynamics in modern America that explores how Americans construct their social realities and cultural histories and how modern society shapes their lived experience Conceiving Contemporary Parenthood Zeynep B. Gürtin, Charlotte Faircloth, 2020-12-23 With the global expansion of reproductive technologies there are ever more ways to create a family and more family types than ever before This book explores the experiences of those persons whether single in a couple or part of collective co parenting arrangements whether hetero or homosexual whether cis or transgender who are creating what has been termed new family forms with reproductive assistance Drawing on qualitative research from around the world the book is particularly anchored in two bodies of social science scholarship sociological and anthropological inquiries into the cultural impact of reproductive technologies on the one hand and parenting culture studies on the other It seeks to create fertile conversations between these scholarships highlighting the intersections in the ways we think about conceiving and caring for children in today's reproductive landscape Focusing specifically on persons whose reproductive journeys do not conform to dominant scripts the book traces the many ways in which intentions expectations and technological developments contribute to changing and enduring conceptions of good parenthood in the twenty first century Taking a holistic perspective the book presents deep insights into the experiences not only of intending parents but also of donors surrogates medical professionals and activists The collection will be of interest to an international readership of scholars of gender reproduction parenting and family life The chapters in this book were originally published as a special issue of Anthropology Medicine
