Concepts of Force Max Jammer, 1999-01-01 This work by a noted physicist traces conceptual development from ancient to modern times Kepler's initiation Newton's definition subsequent reinterpretation contrasting concepts of Leibniz Boscovich Kant with those of Mach Kirchhoff Hertz An excellent presentation Science **Concepts of Force** Max Jammer, 1975 **Concepts of Force** Max Jammer, 1957 **Metaphors and Action Schemes** Robert L. Schwarz, 1997 All our abstract ideas are based on metaphors and action schemes Jean Piaget did voluminous research on how thought develops in children through assimilation of action schemes George Lakoff and Mark Johnson have done pioneering work on metaphors and action schemes in everyday thinking This book builds on those foundations looking at the role played by metaphors and action schemes in the history of ideas The author begins his argument by taking a critical look at the philosophy of metaphor from Aristotle to the present While he sees metaphor as simply conceiving one thing in terms of another he points out that this is an inexhaustible process because the context in which the process takes place is always changing Change opens up new possibilities of similarity Thus the metaphor is an open door into a space of infinite possibilities *Concepts of Force, a Study in Foundations of Dynamics*, 1957 **Action and Reaction** Paul Theerman, Adele F. Seeff, 1993-04 The volume opens with an essay by Richard S Westfall that justifies claims that Newton was the culmination of the scientific revolution The I Bernard Cohen essay that follows illustrates the difference between mathematical principles and natural philosophy Two complementary papers give new insights into the Newtonian foundations of celestial mechanics William Harper analyzes Newton's argument for universal gravitation from the perspective of a philosopher of science Michael S Mahoney discusses the mathematical aspects of Newton's use of force law to determine planetary orbits Proceedings of the 1972 Biennial Meeting of the Philosophy of Science Association K.
