Concrete Mushrooms Reusing Albanias 750000 Abandonned Bunkers:

Concrete Mushrooms Elian Stefa, Gyler Mydyti, Niku Alex Muçaj, 2012 During Albania's period under the rule of the Marxist Leninist Enver Hoxha between 1945 and 1985 some 750 000 bunkers were constructed all over the Albanian landscape All are rounded and mushroom like in design and remain as a legacy of Hoxha's fear based isolationist policies The book contains descriptions and photographs of variously located bunkers as well as information relating to their potential for use today

Concrete Mushrooms Elian Stefa, 2012 *After the end* David L. Pike, 2024-04-09 *After the End* argues that the cultural imaginaries and practices of the Cold War continue to deeply shape the present in profound but largely unnoticed ways across the global North and in the global South The argument draws examples from literature and literary criticism film music the historical and social scientific record and past and present physical sites to consider the bunker as a material form an image and as a fantasy that took shape in the global North in the 1960s and that spread globally into the twenty first century *After the End* reminds us not only that most of the world's peoples have lived with or died from apocalyptic conditions for centuries but that the Cold War imaginaries that grew from and fed those conditions continue to survive as well

Global Undergrounds Carlos López Galviz, Paul Dobraszczyk, Bradley L. Garrett, 2016-06-15 Rest your eyes long enough on the skylines of Delhi Guangzhou Jakarta even Chicago or London and you will see the same remarkable transformation building after building going up with the breakneck speed of twenty first century urbanization But there is something else just as transformative that you won't see sprawling networks of tunnels rooting these cities into the earth *Global Undergrounds* offers a richly illustrated exploration of these subterranean spaces charting their global reach and the profound but often unseen effects they have on human life The authors shine their headlamps into an astonishing diversity of manmade underground environments including subway systems sewers communications pipelines storage facilities and even shelters There they find not only an extraordinary range of architectural approaches to underground construction but also a host of different cultural meanings Underground places can evoke fear or hope they can serve as sites of memory places of work or the hidden headquarters of resistance movements They are places that can tell a city's oldest stories or foresee its most distant futures They are places ultimately of both incredible depth and breadth crucial to all of us topside who work as urban planners geographers architects engineers or any of us who take subway trains or enjoy fresh water from a faucet Indeed as the authors demonstrate the constant flux within urban undergrounds the nonstop circulation of people substances and energy serves all city dwellers in myriad ways not just with the logistics of day to day life but as a crucial part of a city's mythology

Re-inhabiting Cold War Sites Olivia Longo, Davide Sigurtà, Carlotta Coccoli, 2021-12-31 In the north east of Italy the sites of the Cold War represent an excellent opportunity to enhance the landscapes and cultures of the places where they are located By their nature these sites were part of an international and intercontinental technological and military context Gathering theoretical insights and design practice for the enhancement of these important sites this book collects

different international experiences around the theme of the reuse and architectural design of recently abandoned military areas to try to awaken attention to these important territorial signs that are in danger of disappearing
