Top Secret - Photocopiable Worksheets for Enhancing the Stewie Scraps Stories Sheila M. Blackburn, 2010 Top Secret is a teacher's resource designed to accompany the Stewie Scraps series of reading books. It consists of six sets of photocopiable worksheets exploring the children's understanding of each book in turn. There are teacher's notes that explain the tasks and give suggestions about use to help develop reading, writing and comprehension skills. The beginning of each section gives a brief synopsis about the book before going on to the tasks involved. Ending each section is a set of comprehension questions that allows you to determine whether the children have fully understood the books. All the Stewie Scraps series of books as well as this resource have been illustrated by Leighton Noyes, a noted children's book illustrator. Stewie also has his own website www.stewie-scraps.co.uk. It contains excerpts from his stories, information about his family, the author and illustrator, and a special Top Secret area to be accessed only by those creative genius possessing the password.

Logic In Wonderland: An Introduction To Logic Through Reading Alice's Adventures In Wonderland - Teacher's Guidebook Nitsa Movshovitz-hadar, Atara Shriki, 2018-10-08 This guidebook is for college instructors who teach a course in Introduction to Logic at a teachers college or provide a workshop in this subject for in-service mathematics teachers. It can also be used by high school mathematics teachers for teaching students who are capable and interested in Logic. Learning is based on reading Alice's Adventures in Wonderland and discussing quotes from that book as a trigger for developing basic notions in Logic. This guidebook includes the student's worksheets with exemplary solutions, the background in elementary logic and pedagogical comments. There is a student's workbook that accompanies this guidebook which includes the student's worksheets without solutions. Ordinary textbooks for such a course are purely mathematical in their nature and students usually find the course difficult, boring and very technical. Our approach is likely to motivate the students through reading the classic novel Alice's Adventures in Wonderland written by Lewis Carroll, who was not only one of the best storytellers but also a logician.
