, 1861 **Inadvertent Images** Peter Geimer, 2018-03-14 As an artistic medium photography is uniquely subject to accidents or disruptions that can occur in the making of an artwork Though rarely considered seriously those accidents can offer fascinating insights about the nature of the medium and how it works With *Inadvertent Images* Peter Geimer explores all kinds of photographic irritation from throughout the history of the medium as well as accidental images that occur through photo like means such as the image of Christ on the Shroud of Turin brought into high resolution through photography Geimer's investigations complement the history of photographic images by cataloging a corresponding history of their symptoms their precarious visibility and the disruptions threatened by image noise Interwoven with the familiar history of photography is a secret history of photographic artifacts spots and hazes that historians have typically dismissed as spurious phenomena parasites or enemies of the photographer With such photographs it is virtually impossible to tell where a picture has been disrupted where the representation ends and the image noise begins We must Geimer argues seek to keep both in sight the technical making and the necessary unpredictability of what is made the intentional and the accidental aspects representation and its potential disruption **Angels of Efficiency** Florian Hoof, 2020 *Angels of Efficiency* traces the invention of film and the parallel rise of management consulting telling the story of how these together brought about new forms of information visualization and visual management The period from 1880 to 1930 author Florian Hoof argues saw the genesis of a form of visual knowledge that provided a novel means to intervene in management processes Visual management largely superseded oral and written forms of communication and decision making instituting a strategy for overcoming the mid nineteenth century crisis of control and resulting in a media based form of rationality Focusing largely on early corporate consulting in America by tracing the careers of Frank Gilbreth and his wife and business partner Lillian Gilbreth Hoof examines the rise and lasting effects of corporate consulting as a visual form Framing consulting as a cultural technique that is characterized by media processes in which the boundaries of economic logic and legitimacy emerge *Angels of Efficiency* forges a new approach to the history of consulting In addition to pioneering a new field of film and media studies Hoof contributes original research to American cultural and economic history such as archival findings concerning Gilbreth's consulting efforts for the German Army during WWI With this distinct and innovative interdisciplinary approach

Hoof has marshalled cinema and media studies business history and science and technology studies to make sense of the rise of consulting practices and their remarkable stability to this day **Buchstaben, Bilder, Bytes** Projekt
