J.L. Cloudsley-Thompson

Die Tierwelt Des Tropischen Regenwaldes:

Biology Pamphlets, 1913 Aspects of Zoogeography P. Müller, 2012-12-06 Zoogeography aims to explain the structure function and history of the geographical ranges of animals The absence or presence of a species in a given place has ecological as well as historical causes It is therefore a mistake to suppose that reconstructing the phylogenetic connections of a taxon will by itself give a definite picture of how its range originated A purely ecological interpretation of the range could be equally misleading if it did not take into account the population genetic structure underlying the geographical range Phylogenetic systematics population genetics autecology and synecology have all their own methods none of which can be substituted for another without which a range cannot be studied or interpreted The present book covers only certain aspects of the wide field of zoogeography These are in the form in which they were crystallised in the course of innumerable discussions with my teachers my colleagues at home and abroad and my fellow workers postgraduates and students at Saarbrücken as well as in the zoogeographical part of my basic lectures on biogeography for the year 1973 1974 The chief emphasis is laid on the genetic and ecological macro structure of the biosphere as an arena for range structures and range dynamics on urban ecosystems which have hitherto been grossly neglected and on the most recent history of ranges the dispersal centre concept The marine and fresh water biocycles on the other hand have been dealt only briefly

Lebensformen und lebensweise der Walddiere im tropischen Afrika Leo Waibel, 1913 Biogeography and Ecology in South America E.J. Fittkau, J. Illies, H. Klinge, G.H. Schwabe, 2012-12-06 With *Biogeography and Ecology in South America* as the general theme a total of twenty nine contributions by thirty authors is offered here in two volumes being volumes 18 and 19 of the *Monographiae Biologicae* Most of these discussions deal with decidedly specialist themes and the editors have been particularly concerned to ensure that the authors enjoyed the greatest possible freedom in the preparation of their work in order that different points of view and interpretations together with some questions of controversy may be clarified This also applies of course to the several chapters in which general themes geographical substance climate geology vegetation amongst others are discussed Since the amount of material available is too great to enable one to aspire to a presentation of the complete biogeographical and ecological picture this procedure seems expedient However these two volumes could well be regarded as being a preparatory work for just such a complete description Each of the separate technical contributions refers to the continent as a whole in order to characterise it as such from the viewpoint of the specialist For this reason it was necessary to forgo special discussions of particular regions or types of landscape although South America of all places is remarkably rich in unique regional phenomena the altiplano of Peru and Bolivia the relict forests of Fray Jorge the shrub formations of Tierra del Fuego the lakes of the High Andes for example *Terrestrial Environments* J.L. Cloudsley-Thompson, 2019-09-18 Originally published in 1975 *Terrestrial Environments* covers the zoogeography and ecology of the main terrestrial environments of the world including fresh water habitats with emphasis on

their fauna The book also explores climate and vegetation in so far as they affect animal life Finally the selective influence of the environment on its fauna is discussed and conversely the influence of regulation a synthesis of these interrelations Morphological adaptations of the animals inhabiting various types of terrestrial environments are considered in relation to locomotion feeding and escape from enemies Physiological adaptations are also mentioned briefly and the adaptive importance of diurnal and seasonal rhythms is stressed Wildlife Review ,1985 **Der tropische Regenwald als**
