Thomas Heywood, John C. Burnett Jr., 2011 Cardiorenal syndrome the presence of significant renal insufficiency and heart failure simultaneously constitutes one of the most vexing and difficult challenges facing clinicians and researchers today Given the fundamental role of the kidneys in maintaining fluid and electrolyte balance within the body it comes as no surprise that renal abnormalities are inextricably linked with congestive heart failure What is surprising is that recent data have indicated that renal dysfunction is a more critical determinant of mortality than heart failure itself In The Cardiorenal Syndrome A Clinician's Guide to Pathophysiology and Management experts from around the world clearly outline the current issues associated with this increasingly prevalent condition provide invaluable insight into its pathophysiology and highlight the risks benefits and rationales for both practical and promising prevention and treatment strategies including Diuretics Role of ACE inhibitors angiotensin receptor blockers in renal dysfunction New designer peptides for heart failure Inotropes and neurohormonal blockade Dialysis and ultrafiltration Renal cell therapy Left ventricular assist device implantation Renal and or heart transplantation While recognition of the role of renal dysfunction in the progression of heart failure is a pivotal advance many questions about the scope and impact of this condition remain This book serves as a touchstone for cardiovascular specialists and internists as they encounter the diverse varieties of cardiorenal syndrome and attempt to navigate the radically different and evolving therapeutic options in their quest to provide optimal individualized care for their patients

Building from this case key questions are posed that are relevant to the clinical management and then potential evidence based treatment strategies are proposed Topics covered include loop diuretic resistance in acute and chronic heart failure abdominal congestion low output failure and potential diuretic complications due to hyponatremia Cardiorenal Syndrome in Heart Failure thoroughly reviews cardiorenal syndrome from the perspective of both the cardiologist and nephrologist Its case based approach makes it an ideal resource for both practising and trainee cardiology and nephrology practitioners

Cardiorenal Syndrome Adel E. Berbari, Giuseppe Mancia, 2010-10-04 Chronic kidney disease with a worldwide prevalence of 10% in the general population is emerging as a major public health priority Renal dysfunction is associated with a high risk for cardiovascular complications The relationship between renal insufficiency and cardiovascular disease termed the cardiorenal syndrome exists whether impairment of renal function is a consequence of primary renal parenchymal disease or primary heart disease Several pathophysiologic mechanisms have been postulated to explain the relationship between renal dysfunction and cardiovascular disease Recent studies indicate an integrated response of the vascular smooth muscles and glomerular mesangial cells to traditional and uremia related cardiovascular risk factors Traditional risk factors can incite renal impairment and cardiac damage As renal function deteriorates uremia related risk factors play an increasing role both in reduction in glomerular filtration rate and cardiovascular damage Several uremia related factors such as uncontrolled hypertension disturbed glucose insulin metabolism microalbuminuria phosphate retention secondary hyperparathyroidism myocardial and vascular calcification hypertensive uremic cardiomyopathy inflammation oxidant injury and neurohormonal dysregulation have been implicated in the pathogenesis of the cardiorenal syndrome Recent data suggest that management of the cardiorenal syndrome requires aggressive control of traditional risk factors as well novel approaches to prevent or reverse uremia related processes This book provides a comprehensive update analysis of our current understanding of the cardiorenal syndrome including epidemiology pathophysiologic mechanisms and therapeutic approaches **Cardiorenal**
