The Criteria Cognitive Aptitude Test (CCAT) is a pre-employment assessment designed to measure problem-solving abilities, learning skills, and critical thinking. It's commonly used to gauge a candidate's ability to learn new information, think critically, and apply information in various contexts.

While the standard CCAT usually consists of 50 questions to be answered in 15 minutes, variations of the test with different numbers of questions might exist, depending on the specific requirements of the employer or the role.

Here's an example of a type of question you might encounter on the CCAT. Keep in mind that this is a general representation, and the actual test questions may vary.
