

Collision Theory - Impact for a Chemical Reaction

Why?

The collision theory states that a chemical reaction can only occur between particles when they collide (hit each other). The collision between reactant particles is necessary but not sufficient for a reaction to take place. The collisions also have to be effective. It is important to understand the exact nature of an effective collision since this determines whether or not particles actually react with each other and form new products.

Learning Objectives

- Identify the requirements needed for a successful reaction to occur between reactant particles.

Success Criteria

- Explain the meaning of an effective collision.
- Explain the requirements needed for a reaction to occur between reactant particles.
