Capital One Judgement:

Professionalisation of School Leadership Jakob Ditlev Bøje, Lars Frode Frederiksen, Bjørn Ribers, Finn Wiedemann, 2021-11-15 This book examines the subject of school leadership as a profession. It tackles questions of what it means to be professional and to work within a profession and how school leadership fits within these definitions. The book analyses five areas which in the sociology of professions are considered important for an occupation to qualify as a profession: knowledge base, education and training, ethics, working conditions, and formation of a professional identity. Based on these criteria, the book offers a comprehensive analysis into a sociological definition of the professional status of school leadership. The authors argue that school leadership is an emerging profession characterised by development and efforts across different areas. Contributing to the discussion and theorisation of professionalisation, this book will be valuable reading for scholars, researchers, and students in the field of educational leadership and educational policy.

Marx's 'Grundrisse' and Hegel's 'Logic' (RLE Marxism) Hiroshi Uchida, 2015-04-17 Marx's *Grundrisse* is acknowledged as the vital link between Marx's early and late work. It is also a crucial text in elucidating Marx's debt to the idealist philosopher G. W. F. Hegel. This book, first published in 1988, is the first full-length study of that relationship in a thorough textual analysis which makes the connections explicit and also the *Grundrisse*'s relations to the works of Adam Smith and Aristotle. This book argues that Marx's critique of political economy and his critique of Hegel are double interrelated. Not only did Marx adapt Hegelian logic in order to analyse the economic categories crucial to modern society, but it is argued that those logical categories were themselves seen as reflections of the productive processes of contemporary commercial society. Uchida reveals a conceptual structure common to the apparently rarefied world of Hegelian conceptual logic and to the supposedly common-sensical world of economic science. Demonstrating this is a considerable achievement and it allows us to consider precisely what is valuable today in Marx's critical commentary on this conceptual structure and on the type of society in which it is manifested. Uchida's subject like Marx's is the force of capital on modern life.

Nurturing Professional Judgement Ben Knight, 2025-02-28 In the moment dilemmas and situational awareness are central to teachers' work, but these concepts may not always find their way into teacher education as they often get pushed aside in favour of curriculum coverage and compliance agendas. This book challenges a technicist and mechanistic view of teaching and learning to examine how teacher educators might best prepare soon-to-be teachers to make sound professional judgements in their classroom practice. It discusses evidence in the literature that teaching does not

directly produce learning and that nurturing learning is a complex business which relies on both art and science Current policies and compliancy agendas influencing the content of ITE programmes are analysed and the text provides practical suggestions for how to nurture professional judgement in trainee teachers through HE provision and school based mentoring It describes the dynamism of those who teach in classrooms and reminds teacher educators of the value and necessity of managing structure and improvisation protocol and intuition which are at the heart of what it means to be a professional A new addition to our Critical Guides for Teacher Educators series *The Gentleman's Magazine: Or, Monthly Intelligencer*

Edward Cave,1767 **Managerial Economics (Analysis of Managerial Decision Making), 9th Edition** Ahuja H.L.,2022 Widely acknowledged this popular and detailed text is a comprehensive treatise on Managerial Economics both micro and macro economic aspects This text ensures a thorough understanding of core concepts before advancing to provide an expanded treatment of topics It explains the economic environment and the impact on managerial decisions regarding price output determination in different market structures followed by an account of the behaviour of individuals under conditions of uncertainty *The Measurement of Moral Judgement: Volume 2, Standard Issue Scoring Manual* Ann Colby, Lawrence Kohlberg,1987-09-30 This work was originally issued as a two volume set published in 1987 and 1988 It constitutes a definitive presentation of the system of classifying moral judgment built up by Lawrence Kohlberg and his associates over a period of twenty years Researchers in human development and education around the world many of whom have worked with interim versions of the system indeed all those seriously interested in understanding the development of moral judgment will find it a useful and accessible resource Volume 2 includes the scoring systems for three alternate functionally equivalent forms of Kohlberg's moral judgment interview *Quantum Governance* Fadi Farra, Christopher Pissarides,2023-09-15 Old systems of governance are struggling to cope with the pressures placed on them by the accelerating development of modern society There is a desperate need for change Quantum Governance offers a new way of thinking about policy implementation and has profound ramifications for policymakers **Capitalism and the Limits of Desire** John Roberts,2021-08-12 Addressing Spinoza's perennial question why do the masses fight for their servitude as if it was salvation Capitalism and the Limits of Desire examines the ways in which self love as the care of the self has become intertwined with self love as the pursuit of pleasure With ongoing austerity and misery for so many why does capitalism seem to be so insurmountable so impossible to move beyond John Roberts offers a compelling response it is because we love the love of self that capitalism enables even though it brings anxiety and self scrutiny Capitalism in the form of commodities and more importantly the online platforms through which we express ourselves has become so much of who we are of how we define self love as self pleasure that it is difficult to imagine ourselves outside of it Roberts contends that disentangling ourselves from this collapsing of self into capitalism is possible and that understanding the insidious nature of capitalist thinking even when it comes to our deepest pleasures is the starting point Using early and late Marx Lacan's distinction

between pleasure and desire and the recent debate on perfectionism Hurka as his guides Roberts lays out a way for individuals to move forward and forge a link between self and desire outside the oppressive demands of platform capitalism
