Battered Women and Their Families Albert R. Roberts DSW, PhD, BCETS, DACFE, 2007-01-18 With a foreword by Barbara W White PhD University of Texas at Austin The definitive work on battered women is now in a timely third edition Considered the complete in depth guide to

effective interventions for this pervasive social disease Battered Women and Their Families has been updated to include new case studies cultural perspectives and assessment protocols In an area of counseling that cannot receive enough attention Dr Robert s work stands out as an essential treatment tool for all clinical social workers nurses physicians and graduate students who work with battered women on a daily basis New chapters on same sex violence working with children in shelters immigrant women affected by domestic violence and elder mistreatment round out this unbiased multicultural look at treatment programs for battered women Understanding Crisis Therapies Hilda Loughran,2011 Crisis intervention is a brief therapy and immediate response which aims to support the person through the crisis period This book covers the different influences on crisis therapies and traces the development of crisis theory across its different phases *The Violence of Care* Sameena Mulla,2023-11-21 Winner 2017 Margaret Mead Award presented by the American Anthropological Association and the Society for Applied Anthropology Honorable Mention 2015 Eileen Basker Memorial Prize presented by the Society for Medical Anthropology Analyzes the ways in which nurses work to collect and preserve evidence while addressing the needs of sexual assault victims as patients Every year in the US thousands of women and hundreds of men participate in sexual assault forensic examinations Drawing on four years of participatory research in a Baltimore emergency room Sameena Mulla reveals the realities of sexual assault response in the forensic age Taking an approach developed at the intersection of medical and legal anthropology she analyzes the ways in which nurses work to collect and preserve evidence while addressing the needs of sexual assault victims as patients Mulla argues that blending the work of care and forensic investigation into a single intervention shapes how victims of violence understand their own suffering recovery and access to justice in short what it means to be a victim As nurses race the clock to preserve biological evidence institutional practices technologies and even state requirements for documentation undermine the way in which they are able to offer psychological and physical care Yet most of the evidence they collect never reaches the courtroom and does little to increase the number of guilty verdicts Mulla illustrates the violence of care with painstaking detail illuminating why victims continue to experience what many call secondary rape during forensic intervention even as forensic nursing is increasingly professionalized Revictimization can occur even at the hands of conscientious nurses simply because they are governed by institutional requirements that shape their practices The Violence of Care challenges the uncritical adoption of forensic practice in sexual assault intervention and post rape care showing how forensic intervention profoundly impacts the experiences of violence justice healing and recovery for victims of rape and sexual assault
