Math Pacing Guide Las Cruces Public Schools

Understanding Mathematics: The standards define what students should understand and be able to do in their study of mathematics. Asking a student to understand something means asking a teacher to assess whether the student has understood it.¹ Mathematical understanding and procedural skill are equally important.²

Description of the Pacing Guide: A pacing guide is an interval-based description of what teachers teach in a particular grade or course; the order in which it is taught, and the amount of time dedicated to teaching the content.

Purpose of a Pacing Guide: The purpose of a pacing guide is to ensure that all of the standards are addressed during the academic year. Each pacing guide is nine weeks in duration.

Components of the Pacing Guide:

- **Critical Areas-** Each grade level has identified Critical Areas. These areas are woven throughout the standards and should receive additional time and attention.
- **Mathematical Practice Standards (8)-** Based on the NCTM Process Standards, these standards describe the variety of "processes and proficiencies" students should master while working with the Grade Level Content Standards.
- **Domains are larger groups of related Content Standards.** Standards from different domains may sometimes be closely related.³
- **Clusters are groups of related standards.** Note that standards from different clusters may sometimes be closely related, because mathematics is a connected subject.⁴
- **Grade level standards define what students should know and be able to do by the end of each grade level.**
- **Unpacked standards provide a clear picture for the teacher as he/she implements the CCSS.**
- **Resources—**includes but not limited to current district core resources.
